NUCLEAR INSTRUMENTS AND METHODS

A journal on accelerators, instrumentation and techniques in nuclear physics

EDITOR: K. SIEGBAHN, UPPSALA
ASSOCIATE EDITOR: C. NORDLING, UPPSALA

EDITORIAL BOARD:

J. B. ADAMS (CERN)
F. A. ALSINA (Caracas)
H. L. ANDERSON (Chicago)
K. T. BRAINBRIDGE (Cambridge, Mass.)
M. Q. BARTON (Upton)
P. R. BELL (Houston)
R. E. BELL (Montreal)
S. BRANDT (Siegen)
H. BRINKMAN (Groningen)
E. H. COOKE-YARBOROUGH (Harwell)
M. DEUTSCH (Cambridge, Mass.)
B. S. DŽELEPOW (Leningrad)
W. GENTNER (Heidelberg)
F. S. GOULDING (Berkeley)
O. HAXEL (Karlsruhe)
R. L. HEATH (Idaho Falls)
M. S. KOSODAEV (Moscow)
F. KRIENEN (CERN)
H. MAIER-LEIBNITZ (Grenoble)
E. M. McMILLAN (Berkeley)
M. G. MESCHERYAKOV (Moscow)
W. PAUL (Bonn)
A. S. RAO (Hyderabad)
J. R. RICHARDSON (Vancouver)
M. SAKAI (Tokyo)
G. SALVINI (Rome)
CH. SCHMELZER (Heidelberg)
A. M. SESSLER (Berkeley)
N. G. SJÖSTRAND (Göteborg)
R. TANGEN (Oslo)
E. W. TITTERTON (Canberra)
R. VAN LIESHOUT (Amsterdam)
J. WALKER (Birmingham)
O. WERNHOLM (Stockholm)
R. R. WILSON (Cornell)

INFORMATION TO AUTHORS

Contributions, written in English, French or German, and books for review may be sent either directly to the Editor, Professor K. Siegbahn, Institute of Physics, University of Uppsala, Sweden, or to one of the members of the Editorial Board. *Contributions and figures to be sent in duplicate.*
Short contributions of *less than 1500 words* and not subdivided into sections, may be published as Letters to the Editor, in a shorter time than regular articles as the proofs will normally be corrected by the publisher.
Review articles, written in English, may be sent directly to the Editor.

Before mailing the manuscript, please check the following points:
1. Is there an *abstract* in English? (Letters to the Editor should have an abstract of *less than 30 words.*)
2. Have you given the name(s) of the author(s) on the manuscript and the name and address of the institute where the research work was done? (Proofs will be sent by the publisher to this address.) For the sake of correct indexing in abstracts journals etc. it is recommended that authors use full forenames rather than just initials.
3. Is the manuscript clearly typewritten, with ample space between the lines, is the subdivision logical, and are the text and figures *ready for printing*? (It is impracticable to send alterations during the printing process. The galley proof which will be sent to you serves only to correct actual printing errors and to make a slight change or addition, if *strictly necessary.*)
4. Have you enclosed inked original drawings, or (*preferably not*) glossy prints of every figure, ready for direct reproduction? Are all details, especially the lettering and numbering, sufficiently large to show up clearly in the reduced size of the printed figure? (The consequence of making the slightest changes in the figures of the galley proof is that in most cases *new blocks* must be made.) Your figure material will be returned to you after publication of the article.
5. Is there a *separate* list of the figure captions? (All figures should have captions.)
6. Is the list of references complete, in accordance with the convention of the journal and are all author's initials given in all references?
7. Is a copy of the manuscript and copies of its figures attached to the original manuscript?

Objective and descriptive material on endeavours and product developments from the industry for the section "Spotlight on Industry" should be sent directly to the publishers, North-Holland Publishing Company, P.O. Box 103, Amsterdam.

INFORMATION FOR ADVERTISERS

Advertising orders and enquiries can be sent to the Advertising Manager, North-Holland Publishing Co., Journal Division, P.O. Box 211, Amsterdam. The Netherlands.

U.S.A. Mrs. Leni Ellinger, 3133 Connecticut Avenue, N.W., Suite 712, Washington, D.C. 20008.

France. Régie Publicité Industrielle, 36, rue du Fer-à-Moulin, Paris 5e, Tél. 707-53-39.

United Kingdom. T.G. Scott & Son Ltd., 1 Clement's Inn (Strand), London WC2A 2ED.

Nuclear Instruments and Methods is published semi-monthly. The subscription price of a volume is Hfl. 180.00, postage-included.
Subscriptions should be sent to the publishers, North-Holland Publishing Company, P.O. Box 211, Amsterdam, or to any subscription-agent.
Claims for missing numbers should be made within two months, following the data of publication. The publishers expect to supply missing numbers free only when losses have been sustained in transit and when the reserve stock will permit.

SUBJECT INDEX

Accelerators, Beam Handling and Targets

Collimation of the internal electron beam in a synchrotron, Shiro Suzuki, Tsuneaki Tsuru, Takeshi Katayama, Masaaki Kobayashi and Seigi Iwata . . . **111** (1973) 39
Experimental investigations of Li^+ ion gun characteristics, J. Vukanić and I. Terzić . . . **111** (1973) 117
A fast beam pulsing system for the Stockholm 225-cm cyclotron, K. Abrahamsson, A. Filevich, K.-G. Rensfelt and J. Sztarkier . . . **111** (1973) 125
Minimizing the effects of disturbing magnetic fields in a cyclotron axial injection system, N. Hazewindus, A. M. M. Otten and A. Petterson . . . **111** (1973) 181
A special class of pulsed beam preparation systems, Frank Hinterberger . . . **111** (1973) 189
A gated ion source for time-of-flight spectroscopy, R. H. Day and W. C. Parkinson . . . **111** (1973) 199
The $^{14}N(n, p)^{14}C$ reaction in neutron beam strength and other reactor measurements, J. C. Bates . . . **111** (1973) 205
A new preparation method for ^{57}Co Mössbauer sources on a copper matrix, J. Craig Carrell and David K. Dieterly . . . **111** (1973) 333
25 keV neutron beam facility at the reactor "Apsara", E. Kondaiah, R. P. Anand and D. Bhattacharya . . . **111** (1973) 337
Realization of a monokinetic neutron beam with maximum momentum 1.9 GeV/*c*, using the deuterons of the synchrotron Saturne (Saclay), G. Bizard, F. Bonthonneau, J. L. Laville, F. Lefebvres, J. C. Malherbe, R. Regimbart, J. Duflo and F. Plouin . . . **111** (1973) 451
A study of heavy ion beams from a tandem generator, J. M. Freeman and B. W. Hooton . . . **111** (1973) 501
Plasmatron-type ion source for metallic elements, K. Shimizu, K. Kawakatsu and K. Kanaya . . . **111** (1973) 525
Transport efficiency of the helium-jet recoil-transport method with pure helium, Juha Äystö and Kalevi Valli . **111** (1973) 531
A simple method for filtering pump fluid vapors from circulated helium, Seppo Hillebrand, Pertti Puumalainen and Kalevi Valli . . . **111** (1973) 539
Calculations and measurements for a magnetic quadrupole lens with a large aperture and a bell-shaped field distribution, W. Schott, K. Springer, H.-J. Winter and H. Daniel . . . **111** (1973) 541
Sur la calibration en énergie d'un accélérateur Van de Graaff de 2 MeV, H. P. Garnir, G. Weber et L. Winand . **111** (1973) 549
The behaviour of perfluoropolyether and other vacuum fluids under ion and electron bombardment, L. Holland, L. Laurenson, R. E. Hurley and K. Williams . . . **111** (1973) 555
Self-supporting targets of isotopic ^{11}B and ^{13}C (*Letter to the Editor*), E. H. Woodburn, S. Kundu and W. Del Bianco . . . **111** (1973) 611
Shape of Pierce electrodes for divergent wedge-shaped beams (*Letter to the Editor*), H. Z. Sar-El, I. Chavet and M. Kanter . . . **111** (1973) 613
On-demand beam pulsing for an accelerator (*Letter to the Editor*), H. Thibeau, J. Stadel W. Cline and T. A. Cahill . . . **111** (1973) 615
Electron beam with momenta up to 46 GeV/*c* at the Serphukhov accelerator, S. S. Gershtein, A. V. Samoylov, Yu. M. Sapunov, A. M. Frolov, A. I. Alikhanyan, G. S. Vartanyan, S. G. Knyazyan, A. T. Margaryan, A. S. Belousov, N. P. Budanov, B. B. Govorkov, E. V. Minarik, S. V. Rusakov, E. I. Tamm, P. A. Cherenkov and P. N. Shareyko . . . **112** (1973) 477
Helium-jet transportation of recoil atoms into a liquid phase, Pertti Puumalainen, Juha Äysto and Kaleivi Valli **112** (1973) 485
An absolute calibration of electrostatic accelerators in the energy region from 0.7 MeV to 2.1 MeV, P. Kump, V. Ramšak, P. Rupnik and M. Vakselj . . . **112** (1973) 489
A new 5 MHz pulser for the Karlsruhe 3 MV Van-de-Graaff accelerator, S. Liese and D. Roller . . . **112** (1973) 551
α-Quellen für Channeling-Experimente, H. Kirschner . . . **112** (1973) 555
Application of a synchrocyclotron to neutron capture elemental analysis, O. N. Jarvis, A. C. Sherwood, D. West and C. Whitehead . . . **112** (1973) 559
Production d'un faisceau de Fe^- par pulvérisation cathodique dans une source Penning, M. Dumail et G. Chauland Lottet . . . **112** (1973) 607
On the measurement of the field of a magnetic quadrupole lens by means of a Hall probe, N. Hazewindus and F. Martis . . . **112** (1973) 611
Improved technique for the preparation of thin deuterated-polyethylene targets, C. M. Bartle and H. O. Meyer . **112** (1973) 615
Preparation of mercury targets, E. B. Fehr and R. E. Peschel . . . **112** (1973) 617
A computer system for realtime control and data processing at a cyclotron laboratory, B. Mertens and V. Kaltenbach . . . **113** (1973) 125
A multiwire proportional chamber system for monitoring the position and profile of a charged particle beam, C. K. Hargrove, J. P. Legault, L. Bird, H. Mes, R. Sancton, A. C. Thompson and J. Walters . . . **113** (1973) 141
Summary of a report on the construction and use of the magnetic ion source of the Pretoria electromagnetic isotope separator (*Letter to the Editor*), W. H. Gries . . . **113** (1973) 147
Fast forward neutron production in the $^7Li(p, n)^7Be$ reaction for 41- and 64-MeV protons, J. W. Wachter, R. T. Santoro, T. A. Love and W. Zobel . . . **113** (1973) 185

Design, construction and performance of the energy compressing system of the Mainz 300 MeV electron linac, H. Herminghaus and K. H. Kaiser . . . **113** (1973) 18
Measurement of proton beam profiles, Lloyd G. Hyman and Donald Jankowski . . . **113** (1973) 28
Multiple scattering and focusing of charged particles in a magnetized iron medium, V. P. Kartashev, V. I. Kotov and R. A. Rzaev . . . **113** (1973) 28
First operation results of the rf-separated beam at IHEP (*Letter to the Editor*), Ph. Bernard, I. S. Chodirev, N. A. Galjaev, A. Grant, V. I. Kotov, P. Lazeyras, H. Lengeler, B. Maréchal, J. C. Prélaz, A. A. Prillepin, B. V. Prossin and V. E. Zelenin . . . **113** (1973) 29
A hollow discharge duoplasmatron as a negative hydrogen ion source (*Letter to the Editor*), T. H. Sluyters and K. Prelec . . . **113** (1973) 29
A mechanical sample sweeping system for large surface irradiation (*Letter to the Editor*), Stanisław Łazarski, Ewa Maydell-Ondrusz and Małgorzata Drwięga . . . **113** (1973) 30
Luminosity optimisation for storage rings with low-β sections and small crossing angles, Eberhard Keil . . . **113** (1973) 33
Pulsieren des Teilchenstrahles mittels eines ein Resonanzkabel abschliessenden Ablenkkondensators, A. Paulin . **113** (1973) 34
A polarized proton target for low energy nuclear scattering experiments, N. Berovic, C. J. Clews, R. L. Maughan and P. M. Rolph . . . **113** (1973) 41
The beam positions of the SPEAR storage ring, C. R. Carman and J.-L. Pellegrin . . . **113** (1973) 42
Transverse collective instability excited by a non-uniform ν-shift in intense beams, M. Month and K. Jellett . . **113** (1973) 45
A simple water-cooled target-mounting system with a short source-to-sample distance used on a 14 MeV neutron generator (*Letter to the Editor*), E. A. Hermes and H. S. Pruys . . . **113** (1973) 45
Hydrogen cold neutron source calculations for different ortho/para mixtures (*Letter to the Editor*), H. Kalli . . **113** (1973) 46
A polarized photon beam produced by coherent pair production in oriented graphite, R. L. Eisele, D. J. Sherden, R. H. Siemann, C. K. Sinclair, D. J. Quinn, J. P. Rutherford and M. A. Shupe . . . **113** (1973) 48
Interpretation of signals acquired from capacitive phase probes in an isochronous cyclotron, J. A. J. M. van Vliet, F. Schutte, J. F. P. Marchand and H. L. Hagedoorn . . . **113** (1973) 52
Performance of a high-pressure, high-beam-current gas target, John David Carlson . . . **113** (1973) 54
Preparation of well-defined deposits of $^{235}UO_2$, H. L. Adair . . . **113** (1973) 54
Pulsed electrostatic quadrupole focusing for the CERN muon storage ring, W. Flegel and F. Krienen . . . **113** (1973) 54
A rotating target assembly for thin targets (*Letter to the Editor*), R. C. McFadden and P. W. Martin . . . **113** (1973) 60
Note on high resolution measurements with a tandem accelerator (*Letter to the Editor*), E. G. Bilpuch, F. O. Purser, J. D. Moses, T. D. Hayward, H. W. Newson, G. E. Mitchell, D. A. Outlaw and R. O. Nelson . . . **113** (1973) 60
Lifetime of carbon foils used as heavy-ion strippers (*Letter to the Editor*), J. L. Yntema . . . **113** (1973) 60
A gravity operated recoil transfer system (*Letter to the Editor*), J. K. Archer and J. B. Natowitz . . . **113** (1973) 60
Performance of a hot-cathode heavy-ion source installed in a 2 MV Van de Graaff accelerator, J. Denimal, H. Gasser and Ch. Ricaud . . . **114** (1974) 9
Device for determination of charged particle beam profile and position, I. A. Prudnikov, A. S. Toropov, Yu. F. Chichikalov and I. V. Khokhryakov . . . **114** (1974) 10
Some experimental methods for measuring the optical parameters of a beam line, P. A. Reeve, L. P. Robertson, N. M. Al-Qazzaz and C. H. Q. Ingram . . . **114** (1974) 10
Some remarks about the extraction system of the AEG compact cyclotron (*Letter to the Editor*), H. Liesem . . . **114** (1974) 16
High-field iron magnets. A comparison with theory (*Letter to the Editor*), D. E. Baynham, J. H. Coupland and J. Simkin . . . **114** (1974) 16
Physics run with an all plexiglas track sensitive target, T. G. Coleman, C. M. Fisher, E. W. Fitzharris, J. H. Foster, J. G. V. Guy, P. R. Williams, H. Leutz, M. Thevenon, J. Tischhauser and H. Wenninger . . . **114** (1974) 38
A fast, precision electron-beam furnace for accelerator experiments, Ernst Baltrusch, Jörn Bleck, Stephen S. Rosenblum and Wolf-Dietrich Zeitz . . . **114** (1974) 38
Preparation of self-supporting monocrystal Ni-films (*Letter to the Editor*), K. Reichelt, K. H. Luke and M. Rey . . . **114** (1974) 40
Charge-exchange cell with cesium recycling (*Letter to the Editor*), M. Bacal, A. Truc, H. J. Doucet, H. Lamain and M. Chrétien . . . **114** (1974) 40
A terminal stabilizer for a tandem accelerator, J. E. Cairns, M. W. Greene and J. A. Kuehner . . . **114** (1974) 48
Dynamic proton polarization in propanediol below 0.5 K, W. de Boer and T. O. Niinikoski . . . **114** (1974) 49
Fraction of hydrogen atoms in the metastable 2s state by charge exchange of protons in cesium vapor, Vu Ngoc Tuan, A. S. Schlachter and G. Gautherin . . . **114** (1974) 49
Diagnostic system of a beam in analogue mode using proportional chambers, S. P. Chernenko, N. A. Filatova, A. B. Ivanov, M. N. Mikhailova, V. D. Peshekhonov, B. S. Shirokov and Yu. V. Zanevsky . . . **114** (1974) 59
Accelerator energy calibration using the $^{12}C(\alpha,n_0)^{15}O$ threshold, R. E. Shamu, E. M. Bernstein and M. J. Parrott . . . **114** (1974) 66
An analysis of short rotating coil measurements in the fringe field of a quadrupole magnet, R. D. Fyvie and D. E. Lobb . . . **114** (1974) 66
A simple beam-energy measurer for heavy ions (*Letter to the Editor*), D. K. Olsen, N. H. Merrill, S. F. Biagi, W. R. Phillips and A. R. Barnett . . . **114** (1974) 69

Preparation of targets of Ca, Ba, Fe, La, Pb, Tl, Bi, Th and U by electrodeposition from organic solutions, D. C. Aumann and G. Müllen **115** (1974) 75
Self-supporting tantalum nitride target foils, H. W. Fulbright and H. Freiesleben **115** (1974) 83
Calorimetric monitoring system for low duty cycle beams, R. Barbini, S. Faini, C. Guaraldo, C. Schaerf and R. Scrimaglio **115** (1974) 85
Computer control system using the H. P. Basic language for the storage-ring Adone, M. Matera, S. Tazzari and G. Vignola **115** (1974) 89
Utilisation d'aimants supraconducteurs pour des faisceaux de particules de 400 GeV, F. Kircher, N'Guyen Sieu Viet et J. Parain **115** (1974) 213
The design and operation of the Yale–NAL–BNL hyperon beam, V. Hungerbuehler, H. Kraybill, R. Majka, J. N. Marx, P. Némethy, J. Sandweiss, W. Tanenbaum, W. J. Willis, I. J. Winters, M. Atac, S. Ecklund, P. J. Gollon, J. Lach, J. MacLachlan, A. Roberts, R. Stefanski, D. Theriot and C. L. Wang **115** (1974) 221
On the feasibility of colliding beam experiments with longitudinally polarized electrons, N. Christ, F. J. M. Farley and H. G. Hereward **115** (1974) 227
A compact beam scanner in immediate vicinity of the target, J.-L. Duport and S. Jaccard **115** (1974) 233
A simple cell and technique for the electrodeposition of radionuclides on a stainless-steel backing (*Letter to the Editor*), S. R. Joshi and J. C. Roy **115** (1974) 303
A simple, cheap, universal ion source (*Letter to the Editor*), K. Jensen and E. Veje **115** (1974) 307
Computer control of a polarized target, n.m.r. system (*Letter to the Editor*), S. W. Johnsen **115** (1974) 309
An ion source for high-intensity metal ions (*Letter to the Editor*), E. D. Hudson, M. L. Mallory and R. S. Lord **115** (1974) 311
Une nouvelle structure de type H. Comparaison avec la structure interdigitale, A. Chabert, G. Voisin et J. Pottier **115** (1974) 471
Direct on-line visualization system for a monochromatic positron beam using a PDP8/I computer, P. Garganne, P. Daujat and A. Veyssiere **115** (1974) 477
Beam transformations using a helically twisted quadrupole doublet, E. A. Youssef, F. S. Chute and F. E. Vermeulen **115** (1974) 489
A regulator for reducing the effects of terminal voltage fluctuations in tandem accelerators, G. W. Roth and W. G. Weitkamp **115** (1974) 501
He^- and Li^- ions from a modified charge exchange source, G. Philipp, U. Scheib and A. Hofmann **115** (1974) 507
Annihilation photon beam with angular discrimination, D. Blum, J. Boucrot, B. Grossetète, W. McGill and H. Nguyen Ngoc **115** (1974) 553
Gas utilisation in ion sources (*Letter to the Editor*), T. S. Green **115** (1974) 615
A source of polarized ^3He ions, W. E. Burcham, O. Karban, S. Oh and W. B. Powell **116** (1974) 1
Modification of a sputter ion source for Van de Graaff operation, J. K. Hirvonen **116** (1974) 9
On the effect of very small irregularities at the pole faces of a cyclotron magnet on the quality of the ion beam, J. M. van Nieuwland and H. L. Hagedoorn **116** (1974) 13
Power and particle flux balance in a P.I.G. discharge ion source. Part. 1. Ion containment, T.S. Green and C. Goble **116** (1974) 157
Power and particle flux balance in a P.I.G. discharge ion source. Part 2. Ionisation, T. S. Green and C. Goble . . **116** (1974) 165
Preparation of free-standing films of anodic tantalum (*Letter to the Editor*), Dawson Phillips **116** (1974) 195
Coaxial beam-diagnostic probe (*Letter to the Editor*), A. Paulin **116** (1974) 197
A pulsed α-beam with the Erlangen tandem accelerator, D. Frosch, W. Lampert, G. Philipp and U. Scheib . . . **116** (1974) 267
Cryogenic target for a $^2H(\gamma,n)$ photon spectrometer, N. K. Sherman **116** (1974) 301
A sign-selected dichromatic neutrino beam, P. Limon, R. Stefanski, L. C. Teng, T. Yamanouchi and A. Windelborn **116** (1974) 317
Theoretical and experimental study of the duoplasmatron ion source. Part I: Model of the duoplasmatron discharge, C. Lejeune **116** (1974) 417
Theoretical and experimental study of the duoplasmatron ion source. Part II: Emissive properties of the source, C. Lejeune **116** (1974) 429
Production of ^{10}BeO targets via the $^{13}C(n,\alpha)^{10}Be$ reaction, D. R. Goosman **116** (1974) 445
Thin metal windows for gas targets, Nelson Jarmie, Louis J. Morrison and John C. Martin **116** (1974) 451
A highly visible helium target for medium energy physics, J. S. Vincent and W. R. Smith **116** (1974) 551
Measurements on half-wavelength helix resonators, P. J. Bendt, B. H. Erkkila and R. H. Stokes **116** (1974) 555
Evaporation source for ^{57}Fe thin film deposition (*Letter to the Editor*), W. Keune **116** (1974) 591
A simple spectrum monitor for $E \times B$ velocity filters (*Letter to the Editor*), H. Ryssel, H. Müller and K. Schmid . **116** (1974) 593
A new design for accelerating structures (*Letter to the Editor*), D. T. Tran **116** (1974) 597
Phase free acceleration of charged particles by ac fields using deflecting coils and triangular shaped hollow electrodes (*Letter to the Editor*), W. Schott, H.-J. Winter, H. Hagn, K. Springer and H. Daniel **116** (1974) 599
Zur Stabilisierung des Strahlstroms aus dem Hamburger Isochronzyklotron mittels einer Steuerelektrode im Ionenquellenausgang (*Letter to the Editor*), H. Krause und R. Langkau **116** (1974) 603
Is the $^{12}C(\vec{d},d_0)$ reaction a good polarization standard? (*Letter to the Editor*), J. Arvieux, J. Birchall, H. E. Conzett, W. Dahme, W. Haeberli and R. M. Larimer **116** (1974) 605
Polarizing mirrors for atomic beams (*Letter to the Editor*), G. Brautti **116** (1974) 609
Low-velocity projectile-z^3 effect on composite target – mean excitation energies derived from stopping power measurements, L. E. Porter and C. L. Shepard **117** (1974) 1
A nuclear reaction chamber system for research with heavy-ion particle beams, E. J. Feldl **117** (1974) 5

Transmission and reflection properties of a curved copper tube used as a guide pipe for cold neutrons, C. Hofmeyr and K. Isebeck 117 (1974) 9
Un système de détection à 0° du faisceau, utilisant un triplet de lentilles quadrupolaires magnétiques, H. Laurent, J. P. Schapira, S. Fortier, S. Gales et J. M. Maison 117 (1974) 1
Untersuchung zur Steuerung der Phasenbreite beim Hamburger Isochronzyklotron mittels einer Gleichspannungs-Steuerelektrode im Ionenquellenausgang, H. Krause und R. Langkau 117 (1974) 2
A tungsten pin cushion photon beam monitor, Guthrie Miller and Dieter R. Walz 117 (1974) 3
A rapid transport system for internal cyclotron irradiations, G. Bavaria, J. E. Kitching and J. E. Crawford . . 117 (1974) 31
Découpage d'un faisceau électronique en paquets courts à l'aide de deux cavités déflectrices, M. Boussoukaya et A. Septier 117 (1974) 32
Calculations and measurements on the maximum energy of secondary electrons in inclined-field acceleration tubes, Á. Kiss, E. Koltay and Gy. Szabó 117 (1974) 32
Spin motion in e^+e^- storage rings, R. F. Schwitters 117 (1974) 33
Dynamic polarization of protons and deuterons in solid deuterium hydride, Johndale C. Solem 117 (1974) 47
Méthode d'étude de la distribution spatiotemporelle d'un faisceau électronique pulsé de grande puissance, J. C. Arnoud, M. Roche, M. Boivin et Y. Cauchois 117 (1974) 48
The calculation of the field integral or bending power of magnet coils, J. H. Coupland 117 (1974) 49
Design and operation of a charge-state separator based on offset magnetic quadrupoles, D. A. Eastham, T. Joy and N. R. S. Tait 117 (1974) 49
On the optimization of the capacitive beam pick-off (*Letter to the Editor*), W. C. Parkinson, J. F. Petersen and D. C. Duplantis 117 (1974) 60
Beam formation in a triode ion gun, K. Wittmaack 118 (1974) 9
The magnetic analogue method as used in the study of a cyclotron central region, N. Hazewindus, J. M. Van Nieuwland, J. Faber and L. Leistra 118 (1974) 12
The lens effect of the extraction electrode aperture on high-intensity ion beams in electromagnetic isotope separators, M. Menat, I. Chavet and M. Kanter 118 (1974) 13
A method for localizing cells of enhanced surface resistance and magnetic break-downs in multi-cell superconducting rf-cavities, G. Dammertz, L. Husson, H. Lengeler and E. Rathgeber 118 (1974) 14
Comments on "Separated high-energy electron beams using synchrotron radiation", D. White and T. Erber 118 (1974) 14
Flux distribution in a steel side shield, G. W. Bennett, G. S. Levine, H. W. Foelsche and T. E. Toohig 118 (1974) 14
Prototype polarized-electron source through electron–hydrogen spin exchange with teflon containment of hydrogen and a longitudinal magnetic trap, Raymond Krsciokaitis-Krisst and W. K. Peterson 118 (1974) 15
Tune shifts for particle beams crossing at small angles in the low-β section of a storage ring, E. Keil, C. Pellegrini and A. M. Sessler 118 (1974) 16
The geometrical reconstruction of events from track-sensitive targets, C. M. Fisher, J. G. V. Guy and J. W. G. Wignall 118 (1974) 17
Low-energy duopigatron source with an auxiliary gas feed (*Letter to the Editor*), R. E. Hurley 118 (1974) 30
Summing of harmonic frequencies by a resonant cable for pulse generation on a capacitive beam deflector, A. Paulin 118 (1974) 31
Wobble target holder for thin targets in intense light- and heavy-ion beams, D. Hoffmann, G. Sobotta, K. Becker, H. Genz, A. Richter and G. Schrieder 118 (1974) 32
Beams of Be^+ from an rf ion source, Edwin Norbeck and Richard C. York 118 (1974) 32
A close to universal negative ion source, R. Middleton and Charles T. Adams 118 (1974) 32
Intense fast atom-beam production with a grounded large-area ion source, M. Fumelli 118 (1974) 33
High-power standing-wave triperiodic structure for positron acceleration, A. Bensussan, D. T. Tran and D. Tronc . 118 (1974) 34
Low-intensity beam monitoring with an image-intensified scintillator detector, L. L. Kanstein, R. E. Morgado, D. U. Norgren and R. W. Sorensen 118 (1974) 48
Symmetrized double-monochromator systems, Frank Hinterberger 119 (1974) 4
The University of Michigan neutron time-of-flight facility, W. C. Parkinson, J. F. Petersen, R. H. Day, R. M. Polichar, P. F. Julien and D. C. DuPlantis 119 (1974) 5
The University of Michigan cyclotron facility for research in nuclear structure, W. C. Parkinson, J. F. Petersen, R. H. Day, D. C. DuPlantis, W. S. Gray and John Bardwick 119 (1974) 6
A cooling system for thin tritiated titanium targets, J. R. Morales, J. L. Romero and M. E. Brandan 119 (1974) 9
Polarization decay of an ethylene glycol polarized proton target in an intense proton beam, Howard R. Petri and Gerald W. Abshire 119 (1974) 20
A mechanical beam chopper system for the measurement of half-lives in the millisecond region, A. Hashizume, H. Kumagai, Y. Tendow and T. Katou 119 (1974) 20
A simple fast sweeping system for extracted cyclotron beams, J. T. Hood, R. A. Goldworm, E. S. Macias and D. G. Sarantites 119 (1974) 21
Linear accelerator neutron source for neutron scattering, O. K. Harling 119 (1974) 21
The preparation of self-supporting ^{13}C-foils using enriched methane gas, R. Keller and H. H. Müller 119 (1974) 32
Precise determination of inhomogeneous magnetic field components with a Hall probe, Yu. T. Kiselev, N. A. Burgov, S. A. Gerzon, Yu. V. Terekhov, V. I. Ushakov and M. M. Chumakov 119 (1974) 32
A magnetic field clamp with beneficial saturation effects, K. Halbach 119 (1974) 32

Rapid measurement of the effective field boundary of homogeneous field magnets, K. Halbach . . . **119** (1974) 329
A high-quality muon beam in the 10–15 GeV energy range, Stanley M. Flatté, Clemens A. Heusch and Abraham Seiden . . . **119** (1974) 333
An automatic running system for a 500 kV Van de Graaff generator (*Letter to the Editor*), C.-O. Wene and E. Karlsson . . . **119** (1974) 395
NMR calibration of a polarized nuclear target, part of which is radiation-damaged (*Letter to the Editor*), David S. Wollan . . . **119** (1974) 397
A new technique for the production of carbon foils (*Letter to the Editor*), M. J. Keeling . . . **119** (1974) 401
The brightness and emittance of the negative ion beam emitted by a Middleton sputter source, G. Doucas and H. R. McK. Hyder . . . **119** (1974) 413
Energy calibration of a quasi-monoenergetic photon beam with a Ge(Li) diode, U. Berg, U. Kneissl, G. Kuhl and A. Weller . . . **119** (1974) 423
Ionenoptische Eigenschaften mit dem Beschleuniger synchronisierter elektrischer transversaler Wechselfelder, Franz R. Krueger . . . **119** (1974) 605
Lifetime of carbon exciter foils for beam-foil spectroscopy, P. Dobberstein and L. Henke . . . **119** (1974) 611
Analytic field forms in axially symmetric systems, G. Bosi . . . **119** (1974) 613
Profile and contamination of an electron beam (*Letter to the Editor*), Giorgio Romano . . . **119** (1974) 615
Liquid helium-II target for precision measurements of pion cross sections, Hans O. Meyer . . . **120** (1974) 143
Possible sources of polarized X-rays for X-ray fluorescence spectra with reduced backgrounds, R. H. Howell and W. L. Pickels . . . **120** (1974) 187
Preparation and properties of a thermionic sodium ion source, W. Schlagheck and W. Möller . . . **120** (1974) 189
Comparison of equal-velocity ion beams for elemental analysis by ion-excited X-ray emission *(Letter to the Editor)*, T. A. Cahill, R. G. Flocchini, P. J. Feeney and D. J. Shadoan . . . **120** (1974) 193
A method of tuning charged-particle beam transport systems, Stanley M. Flatté, Abraham Seiden and Roger O. Bangerter . . . **120** (1974) 205
Neutron mirror monochromatizing systems (NMMS) incorporating bent mirrors, W. Fiala and C. Pérez Arenas . **120** (1974) 211
An experimental model of migmacell, Part I: Experimental set-up and low-current studies of orbit geometry, Bogdan Maglich, Michael Mazarakis, John Galayda, Barry Robinson, Michael Lieberman, Bruce Weber, Anthony P. Colleraine, Robert Gore, Don Santeller and Ching-Chang Chieng . . . **120** (1974) 309
A high-efficiency neutron spin-flipper for time-of-flight applications *(Letter to the Editor)*, G. Badurek, G. P. Westphal and P. Ziegler . . . **120** (1974) 351
Tritium target for intense neutron source *(Letter to the Editor)*, Rex Booth . . . **120** (1974) 353
A simple laboratory source of 14 MeV neutrons *(Letter to the Editor)*, H. Jeremie, J. C. Deguise and J. Baltar . . . **120** (1974) 355
Design considerations of a simple deuterium gas target for neutron production for therapy with cyclotrons *(Letter to the Editor)*, M. Anwar Chaudhri . . . **120** (1974) 357
High-pressure gas target of modular design *(Letter to the Editor)*, D. V. Webb, G. A. Peterson, Z. M. Szalata and P. T. Kan . . . **120** (1974) 359
A Lamb-shift polarized ion source for the TUNL tandem accelerator, T. B. Clegg, G. A. Bissinger and T. A. Trainor **120** (1974) 445
Neutron polarization from the reaction $^{14}C(d, n)^{15}N$, G. Meyer-Kretschmer, P. B. Dunscombe, R. Maschuw, P. Suhr and B. Zeitnitz . . . **120** (1974) 469
Neutron polarization from the reaction $^{9}Be(\alpha, n)^{12}C$, P. B. Dunscombe, R. Maschuw, G. Meyer-Kretschmer, T. G. Miller, P. Suhr and B. Zeitnitz . . . **120** (1974) 477
A pulsed source of spin-polarized electrons by photoemission from EuO, E. Garwin, F. Meier, D. T. Pierce, K. Sattler and H.-C. Siegmann . . . **120** (1974) 483
Preparation of rubidium targets for high resolution reaction spectroscopy *(Letter to the Editor)*, L. Hulstman, R. D. Vis and J. Blok . . . **120** (1974) 537

Instruments and Methods for High-Energy Physics

Localisation de particules par compteur à migration, J. Saudinos, J.-C. Duchazeaubeneix, C. Laspalles et R. Chaminade . . . **111** (1973) 77
High energy particle identification using multilayer proportional counters, D. Jeanne, P. Lazeyras, I. Lehraus, R. Matthewson, W. Tejessy and M. Aderholz . . . **111** (1973) 287
A sparkostrictive wire-chamber spectrometer, R. J. Cence, F. A. Harris, B. D. Jones, R. E. Morgado, L. M. Shiraishi, D. E. Yount, V. Perez-Mendez, R. Van Tuyl and D. B. Clarke . . . **111** (1973) 379
A spot-focusing Čerenkov counter for the detection of multiparticle events at high energies, M. Benot, J. M. Howie, J. Litt and R. Meunier . . . **111** (1973) 397
Measurement of the cross section for stripping and dissociation of deuterons at 2.7 GeV/c on various nuclear targets (A between 9 and 207), G. Bizard, F. Bonthonneau, J. L. Laville, F. Lefebvres, J. C. Malherbe, R. Regimbart, J. Duflo and F. Plouin . . . **111** (1973) 445
Realization of a monokinetic neutron beam with maximum momentum 1.9 GeV/c, using the deuterons of the synchrotron Saturne (Saclay), G. Bizard, F. Bonthonneau, J. L. Laville, F. Lefebvres, J. C. Malherbe, R. Regimbart, J. Duflo and F. Plouin . . . **111** (1973) 451

A multiwire driftchamber with high space and time resolution, J. Heintze and A. H. Walenta 111 (1973) 46
A system of large multiwire driftchambers, A. H. Walenta 111 (1973) 46
Fast flash-tube hodoscope chambers, G. Brosco, M. Conversi and M. Giovannini 111 (1973) 47
Technical problems involved in H_2 streamer chambers, F. Rohrbach, J. J. Bonnet and M. Cathenoz 111 (1973) 48
Study of signal shaping and energy response of large NaI(Tl) spectrometers for application at NAL, Z. G. T. Guiragossián and R. F. Schilling 111 (1973) 49
Properties of 1 mm pitch wire proportional chambers at high gain, B. Makowski and B. Sadoulet 111 (1973) 56
A new method for particle identification on light nuclear charged particles by means of a solid-state track detector, Akira Murakami 111 (1973) 56
Improving the resolution of high gain channel plate arrays for particle and photon counting, D. Washington . . 111 (1973) 57
Operation of spark chambers in high magnetic fields, F. Bradamante, S. Conetti, C. Daum, G. Fidecaro, M. Fidecaro, M. Giorgi, A. Penzo, L. Piemontese, P. Schiavon and A. Vascotto 112 (1973) 51
Réalisation d'un hodoscope à l'aide d'une chambre proportionelle multifils, V. Comparat, G. Chesneau, R. Margaria et F. Reide 112 (1973) 51
A large general purpose scattering chamber, G. D. Gunn, T. A. Schmick, L. Wright and J. D. Fox 113 (1973)
A modular data acquisition system for multiwire proportional chambers, M. Cavalli-Sforza and D. C. Cheng . 113 (1973) 8
High intensity operation of multiwire proportional chambers, M. Cavalli-Sforza, G. Goggi, W. W. Ash, D. C. Cheng, D. G. Coyne and G. K. O'Neill 113 (1973) 8
A medium-sized neon–helium streamer chamber, J. A. Lightfoot and J. M. Breare 113 (1973) 24
Some characteristics of particle tracks in a neon–helium streamer chamber, J. A. Lightfoot, K. Al Hiti and J. M. Breare 113 (1973) 25
Description of a pair spectrometer used to study the small-angle scattering of high energy photons, G. Jarlskog, L. Jönsson, S. Prünster, H. D. Schulz, H. J. Willutzki and G. G. Winter 113 (1973) 26
Description and performance of an interactive bubble chamber analysis system using an HPD, H. J. Mück, H. H. Nagel and F. Selonke 113 (1973) 26
Measurement of Čerenkov radiation in compressed silica powder (*Letter to the Editor*), A. D. Linney, L. Hugon and J. P. Stroot 113 (1973) 30
A track fitting method for particles in non-uniform magnetic fields, Michael W. Peters 113 (1973) 37
High-accuracy, two-dimensional read-out in multiwire proportional chambers, G. Charpak and F. Sauli 113 (1973) 38
Deep penetration hadron cascade calculations and comparisons to measurements in iron at 24 GeV/*c*, K. Goebel, J. Ranft and J. T. Routti 113 (1973) 43
Construction and performance of 2 m × 4 m wire spark chambers, Thomas A. Nunamaker and David B. Turner 113 (1973) 44
Observation of relativistic rise in the energy loss in plastic scintillator (*Letter to the Editor*), S. A. Gabriele, P. Giusti, T. Massam, F. Palmonari, G. Valenti and A. Zichichi 113 (1973) 46
Photochromic materials as radiation detectors (*Letter to the Editor*), P. J. Ouseph and H. E. Groskreutz 113 (1973) 46
Magnetic multiparticle spectrometer using digitized cylindrical spark chambers, J. R. Ficenec, B. C. Stringfellow, G. B. Collins, A. Ramanauskas, P. Schübelin and F. Turkot 113 (1973) 53
A high-precision quantameter for NAL, F. Harris and D. Yount 114 (1974) 35
Measurement of linear polarization of coherent bremsstrahlung by detecting the angular correlation in pair production, K. Kondo, T. Miyachi, K. Ukai, A. Yamamoto, K. Gotow, H. Yoshida, S. Inaba, S. Kurokawa, H. Muramatsu, N. Sasao, S. Suzuki, M. Kobayashi and S. Iwata 114 (1974) 36
On the multiple efficiency of current limited spark chambers, R. M. Bull, D. L. Henshaw and J. H. Youle . . . 114 (1974) 37
A time-of-flight spectrometer for neutrons from about 150 MeV to 1 GeV, Richard Madey and Frank M. Waterman 114 (1974) 48
Time resolution in a neon–helium streamer chamber, J. A. Lightfoot and J. M. Breare 115 (1974) 12
The scatter focussing of multi-GeV charged particles and neutral hadrons, Lawrence W. Jones and Donald G. Koch 115 (1974) 12
A Gray code hodoscope and fast buffer for beam particle tagging, D. E. Pellett, J. Erwin, D. Faulkner, W. Ko, R. L. Lander and P. M. Yager 115 (1974) 13
The efficient identification of relativistic particles by transition radiation, Michael L. Cherry, Dietrich Müller and Thomas A. Prince 115 (1974) 14
Proportional chambers for a 50 000-wire detector, R. Bouclier, G. Charpak, E. Chesi, L. Dumps, H. G. Fischer, H. J. Hilke, P. G. Innocenti, G. Maurin, A. Minten, L. Naumann, F. Piuz, J. C. Santiard and O. Ullaland 115 (1974) 22
A large detector for slow K^+ mesons, J. P. Astbury, D. M. Binnie, A. D. Duane, J. D. Gallivan, J. D. Jafar, M. F. Letheren, J. G. McEwen, D. G. Miller, D. P. Owen, V. C. Steiner and D. M. Websdale 115 (1974) 43
Design and development of a 1.5 meter streamer chamber system, A. Abashian, N. Beamer, B. Eisenstein, J. D. Hansen, W. Mollet, G. R. Morris, T. O'Halloran, J. R. Orr, D. Rhines, P. Schultz, P. Sokolosky, S. J. Prunster, J. Watson and M. Buttram 115 (1974) 44
A simple method (double reflection method) for measuring the average proton energy by Vavilov–Cherenkov radiation, V. P. Zrelov 115 (1974) 45
Measurement of the gas constants for various proportional-counter gas mixtures, Richard S. Wolff 115 (1974) 46
A high resolution photon tagging system in the GeV region, G. R. Brookes, E. Gabathuler, W. R. Rawlinson, C. Shiel and D. W. L. Tolfree 115 (1974) 46

Analysis of three-body events in $\gamma+D\rightarrow\pi^-+p+p$, D. Blum, J. Boucrot M. McGill, B. Grossetète and H. Nguyen Ngoc **115** (1974) 563
Wire spark chambers with magnetostrictive readout, R. Madaras, A. Litke, Richard Wilson, L. Law, R. Little, J. M. Paterson and G. Hanson **115** (1974) 581
Hybrid amplifier and memorization circuits for multiwire proportional chambers, G. Schultz, Y. Chatelus, J. D. Berst and G. Schaub **115** (1974) 605
A fast and powerful system to measure difficult bubble chamber events, J. Berschin, K. Johnson, P. J. Krause and H. Ströbele **116** (1974) 17
A facility for calibrations and short experiments with heavy ions at the Bevatron, Douglas E. Greiner, Peter J. Lindstrom, Fred S. Bieser and H. H. Heckman **116** (1974) 21
π–μ separation with a 235 g/cm^2 filter, J. T. Dakin and G. J. Feldman **116** (1974) 323
Particle shower detector – The multiplate streamer chamber, M. I. Dayon, O. K. Egorov, V. A. Euschenko, S. A. Krilov, L. G. Makarov, V. A. Scheynkman, V. A. Smirnitsky and A. O. Weissenberg **116** (1974) 329
Response of a large all-liquid scintillation spectrometer and of a 24-layer iron–plastic spectrometer to charged pions and protons in the low-GeV energy range, T. A. Gabriel and J. D. Amburgey **116** (1974) 333
Luminosity measurement at Adone by single and double bremsstrahlung, Hans Christian Dehne, Miro Andrea Preger, Sergio Tazzari and Gaetano Vignola **116** (1974) 345
Calibration of a sampling total-absorption detector at 200 GeV, H. C. Barish, J. F. Bartlett, D. Buchholz, T. Humphrey, F. S. Merritt, Y. Nagashima, F. J. Sciulli, D. Shields, H. Suter, G. Krafczyk and A. Maschke **116** (1974) 413
MIR: Scanning and measurement tables for large bubble chambers, J. P. Baton, H. Blumenfeld, C. Kochowski, R. Miche, B. Pichard, J. Quidort, B. Sauget and J. C. Sellier **116** (1974) 535
Large aluminium wire spark chambers with magnetostrictive read-out, F. Bradamante, S. Conetti, C. Daum, P. Dechelette, G. Fidecaro, M. Giorgi, A. Penzo, L. Piemontese, M. Renevey, P. Schiavon and A. Vascotto **116** (1974) 541
Bubble growth and bubble densities in bubble chambers filled with neon/hydrogen mixtures, G. Horlitz, S. Wolff and G. Harigel **117** (1974) 115
Very large proportional drift chambers with high spatial and time resolutions, D. C. Cheng, W. A. Kozanecki, R. L. Piccioni, C. Rubbia, L. R. Sulak, H. J. Weedon and J. Whittaker **117** (1974) 157
Two-dimensional read-out of a wire spark plane, K. Gustavsson, E. Hagberg, S. Kullander, H. O. Moberg and T. Ekelöf **117** (1974) 171
Spin motion in e^+e^- storage rings, E. F. Schwitters. **117** (1974) 331
Scintillation counter hodoscope arrays for accurate location of particle trajectories in magnetic spectrometers, M. W. Collins, A. E. Groome and P. R. Norton. **117** (1974) 339
A low-density, cylindrical MWPC with simultaneous anode and cathode read-out for use in a magnetic detector, J. Jeanjean, M. Jeanjean, R. Madaras, J. L. Masnou, J. Perez-y-Jorba, A. Quenzer, F. Rumpf, J. L. Bertrand, J. C. Bizot, R. L. Chase, A. Cordier, B. Delcourt, P. Eschstruth and G. Grosdidier **117** (1974) 349
A lead-glass Cherenkov detector for electrons and photons, J. S. Beale, F. W. Büsser, L. Camilleri, L. di Lella, G. Gladding, A. Placci, B. G. Pope, A. M. Smith, B. Smith, J. K. Yoh, E. Zavattini, B. J. Blumenfeld, L. M. Lederman, R. L. Cool, L. Litt and S. L. Segler **117** (1974) 501
Neutrons produced by 740-MeV protons on uranium, L. R. Veeser, R. R. Fullwood, A. A. Robba and E. R. Shunk **117** (1974) 509
Tune shifts for particle beams crossing at small angles in the low-β section of a storage ring, E. Keil, C. Pellegrini and A. M. Sessler **118** (1974) 165
The geometrical reconstruction of events from track-sensitive targets, C. M. Fisher, J. G. V. Guy and J. W. G. Wignall **118** (1974) 171
Silica aerogels used as Cherenkov radiators, M. Cantin, M. Casse, L. Koch, R. Jouan, P. Mestreau, D. Roussel, F. Bonnin, J. Moutel and S. J. Teichner **118** (1974) 177
The Sweepnik system – Performance, C. R. Brown, P. A. Elcombe, J. A. Lang and R. Raja **118** (1974) 183
A multiwire proportional chamber system for use in a storage ring experiment, R. E. Rand, E. B. Hughes, R. Kose, T. W. Martin, W. I. MacGregor and R. F. Schilling **118** (1974) 189
A uniform-field microwave discharge chamber as a high-energy particle-track device, Robert L. Kustom and Raymond E. Fuja **118** (1974) 203
High-resolution cryogenic spark chambers, M. Atac and W. E. Taylor **118** (1974) 413
High-resolution ionization measurements in the region of the relativistic rise, M. Aderholz, P. Lazeyras, I. Lehraus, R. Matthewson and W. Tejessy **118** (1974) 419
A calorimeter for 300 GeV neutrons and protons, L. W. Jones, J. P. Chanowski, H. R. Gustafson, M. J. Longo, P. L. Skubic, J. L. Stone and Bruce Cork **118** (1974) 431
A high-resolution scintillation counter with particle identification for use with pions, D. Axen, G. Duesdieker, L. Felawka, C. H. Q. Ingram, G. Jones, M. Salomon and W. Westlund **118** (1974) 435
Study of total-absorption counters for very-high-energy particles, Antonio Baroncelli **118** (1974) 445
Transition counters for πK differentiation above 400 GeV, C. L. Wang **118** (1974) 453
The needle chamber: A new highly versatile detector, C. Grunberg and J. Le Devehat **118** (1974) 457
A large fast water Cherenkov counter, P. J. Carlson and E. Johansson **118** (1974) 465
Calorimetric and ionization measurements of stopping power in carbon for 19.5 GeV electrons, Kenneth R. Kase and Steve R. Domen **118** (1974) 469

Chambre proportionnelle multi-fils à lecture par division de charge, R. Chaminade, J. M. Durand, J. C. Faivre et J. Pain . . . **118** (1974) 47
Two-dimensional drift chambers, A. Breskin, G. Charpak, F. Sauli and J. C. Santiard . . . **119** (1974)
Low-pressure drift chambers for heavily ionizing particles, A. Breskin, G. Charpak and F. Sauli . . . **119** (1974)
Further results on the operation of high-accuracy drift chambers, A. Breskin, G. Charpak, B. Gabioud, F. Sauli, N. Trautner, W. Duinker and G. Schultz . . . **119** (1974)
Multi-strip scintillation counters (MSSC), Lap Yen Lee, John C. Allred and Clark Goodman . . . **119** (1974) 2
Energy-loss spectrometer for low-energy pion scattering, R. Barbini, S. Faini, C. Guaraldo, C. Schaerf and R. Scrimaglio . . . **119** (1974) 3
A high-intensity superconducting muon channel, D. Dibitonto and D. Hitlin . . . **119** (1974) 18
Study of a pion-stopping telescope by time-of-flight methods, F. Calligaris, P. Ciuti and R. Giacomich . . . **119** (1974) 22
180° magnetic spectrometer with helium-filled streamer chamber, F. Balestra, L. Busso, R. Garfagnini, G. Piragino, R. Barbini, C. Guaraldo, R. Scrimaglio, I. V. Falomkin, M. M. Kulyukin and Yu. A. Shcherbakov . . . **119** (1974) 34
High-resolution readout of multiwire proportional counters using the cathode-coupled delay-line technique, J. L. Lacy and R. S. Lindsey . . . **119** (1974) 48
The identification of secondary particles by ionisation sampling (ISIS), W. W. M. Allison, C. B. Brooks, J. N. Bunch, J. H. Cobb, J. L. Lloyd and R. W. Pleming . . . **119** (1974) 49
A method for studies of small-angle hadron–proton elastic scattering in the Coulomb interference region, A. A. Vorobyov, G. A. Korolev, V. A. Schegelsky, G. Ye. Solyakin, G. L. Sokolov and Yu. K. Zalite . . . **119** (1974) 50
Cherenkov light detection from a liquid hydrogen counter, P. Spillantini . . . **119** (1974) 58
Étude et réalisation d'une matrice de décision utilisant la propagation des signaux dans des lignes à retard à portes ECL, Y. Chatelus, P. Herzog et G. Schultz . . . **119** (1974) 58
Development and test of a liquid-argon shower detector, Gerhard Knies and David Neuffer . . . **120** (1974)
Very-high-luminosity insertions for the CERN intersecting storage rings, B. W. Montague and B. W. Zotter . . . **120** (1974)
Characteristics of multiwire proportional counters with delay-line readout for minimum-ionizing particles, Albert W. Stetz, Victor Perez-Mendez, Jorge Geaga and Harold Spinka . . . **120** (1974) 1
Ionization measurement with PEPR I, J. MacNaughton . . . **120** (1974) 4
Track parametrization in the CERN split-field magnet, J. J. Aubert and C. Broll . . . **120** (1974) 13
Liquid helium-II target for precision measurements of pion cross sections, Hans O. Meyer . . . **120** (1974) 14
The development of a new drift chamber with a new gas mixture, M. Ataç and W. E. Taylor . . . **120** (1974) 14
Delay-line readout of anode planes in proportional chambers, D. M. Lee, S. E. Sobottka and H. A. Thiessen **120** (1974) 15
A liquid-argon ionization calorimeter for detection of electromagnetic and hadronic showers, J. Engler, B. Friend, W. Hofmann, H. Keim, R. Nickson, W. Schmidt-Parzefall, A. Segar, M. Tyrrell, D. Wegener, T. Willard and K. Winter . . . **120** (1974) 15
Liquid-argon ionization chambers as total-absorption detectors, W. J. Willis and V. Radeka . . . **120** (1974) 22
A hodoscope/spectrometer for intermediate and high-energy photons, C. A. Heusch, R. V. Kline and S. J. Yellin **120** (1974) 23
Fluctuations of ionization losses in proportional chambers *(Letter to the Editor)*, A. P. Onuchin and V. I. Telnov . **120** (1974) 36
Pulse-height encoders for the analysis of a large counter system, Yu. B. Bushnin, Rolland P. Johnson, R. N. Krasnokutsky, Yu. V. Mikhailov, V. N. Morozov, Yu. D. Prokoshkin and R. S. Shuvalov . . . **120** (1974) 38
Pulse-height analysis of a large counter system, A. V. Inyakin, Rolland P. Johnson, R. N. Krasnokutsky, A. A. Lebedev, Yu. V. Mikhailov, Yu. D. Prokoshkin and R. S. Shuvalov . . . **120** (1974) 38
An economical method for measuring high voltages in a large counter system, Rolland P. Johnson, R. N. Krasnokutsky, Yu. V. Mikhailov, V. N. Morozov, Yu. D. Prokoshkin and R. S. Shuvalov . . . **120** (1974) 38
A hodoscope spectrometer for high-energy photons, Yu. B. Bushnin, S. V. Donskov, A. V. Inyakin, Rolland P. Johnson, V. A. Kachanov, S. V. Klimenko, R. N. Krasnokutsky, A. A. Lebedev, A. A. Lednev, Yu. V. Mikhailov, Yu. D. Prokoshkin, E. A. Razuvaev and R. S. Shuvalov . . . **120** (1974) 39
Muon shielding around high-energy electron accelerators. Part I. Theory, W. R. Nelson and K. R. Kase . . . **120** (1974) 40
Muon shielding around high-energy electron accelerators. Part II. Experimental investigation, W. R. Nelson, K. R. Kase and G. K. Svensson . . . **120** (1974) 41
Image intensifier camera for streamer-chamber photography, H. Gentsch, E. Gygi, M. Hanney and F. Schneider . **120** (1974) 43
Calibration of a lead-glass gamma detector using electrons up to 5 GeV and tagged photons of 39–270 MeV, H. Dibon, G. Flügge, B. Friend, B. M. K. Nefkens, F. Neuhofer, F. Niebergall, M. Regler, W. Schmidt-Parzefall, K. R. Schubert, P. E. Schumacher, W. Wilmsen and K. Winter . . . **120** (1974) 43

Instruments for Nuclear Spectroscopy

The ion optical properties of the Munich Q3D-spectrograph investigated by means of a special experimental ray tracing method, M. Löffler, H. J. Scheerer and H. Vonach . . . **111** (1973)
Calibration of plastic nuclear track detectors for identification of heavy charged nuclei using fission fragments, Kuninori Endo and Tadayoshi Doke . . . **111** (1973) 2
Geometrical problems in the use of annular detectors, Gerd Klein . . . **111** (1973) 4

Application of the helical cathode proportional chamber to magnetic spectrographs for nuclear reaction studies, E. R. Flynn, S. Orbesen, Nelson Stein, H. A. Thiessen, D. M. Lee and S. E. Sobottka **111** (1973) 67
Detection efficiency of fast neutron time-of-flight detectors and reliability check by measuring tailored source spectra, Friedbert W. Kappler, Detlef Rusch and Eric D. Wattecamps **111** (1973) 83
Si(Li) position sensitive detector, Joseph R. Gigante **111** (1973) 345
Geschwindigkeitsspektrometer mit getrennten Feldern, H. Wollnik, G. Münzenberg und H. Ewald **111** (1973) 355
A computer controlled triple axis neutron spectrometer (TAS) with CAMAC instrumentation and a high level computer language control program, Fritz May, Otto J. Eder, Erwin Schoitsch and Jürgen Schwarzer **111** (1973) 375
A digital Mössbauer effect spectrometer controlled by the multichannel analyzer, A. Biran, E. Berg and D. Arad **111** (1973) 393
Peak shifts in gas proportional scintillation counters, M. A. F. Alves, A. J. P. L. Policarpo and M. C. M. Dos Santos **111** (1973) 413
A new compact soft X-ray gas flow proportional counter, J. A. Cairns, D. F. Holloway and G. F. Snelling . **111** (1973) 419
An array detector for the spectroscopic study of reactions producing ^{8}Be and ^{8}Be*, J. G. Cramer, K. A. Eberhard, N. R. Fletcher, E. Mathiak, H. H. Rossner and A. Weidinger **111** (1973) 425
A flexible collector system for ISOL experiments, M. Alpsten, Å. Appelqvist, B. Bengtsson, E. Borgentun, K. A. Johansson, B. Jonson and G. Nyman **111** (1973) 431
Determination of the efficiency curve of a Ge(Li) detector near the germanium K-edge ($E = 11.104$ keV), B. Rosner and D. Gur **111** (1973) 577
Thin film detector response to the passage of accelerated heavy ions, M. L. Muga, G. L. Griffith, H. W. Schmitt and H. E. Taylor **111** (1973) 581
A position-sensitive surface-barrier Si(Li) detector for low energy γ-rays, U. Biebl and F. Parak **112** (1973) 455
Semiconductor spectrometer with active diaphragm, S. M. Solovjev and V. P. Eismont **112** (1973) 463
Thin dE/dx detectors of uniform thickness made on epitaxial silicon, J. P. Ponpon, P. Siffert and F. Vazeille **112** (1973) 465
Helium-jet transportation of recoil atoms into a liquid phase, Pertti Puumalainen, Juha Äysto and Kalevi Valli . . **112** (1973) 485
Proportional chambers with 1 mm wire spacing, L. E. Price **112** (1973) 507
On cooling silicon surface-barrier particle detectors (*Letter to the Editor*), F. Calligaris, P. Ciuti, I. Gabrielli and R. Giacomich **112** (1973) 591
Two inexpensive automatic sample changers for use with an MCA (*Letter to the Editor*), Jon J. Erickson, Eric L. Eastwold, Judson F. Parker, Robert J. Baglan, Kent H. Larsen and A. Bertrand Brill **112** (1973) 597
Background reduction of high-efficiency Ge(Li) detectors, J. H. Kaye, F. P. Brauer, J. E. Fager and H. G. Rieck, Jr. **113** (1973) 5
Phonon measurements on a filter-detector spectrometer and its resolution function, C. L. Thaper, B. A. Dasannacharya and P. K. Iyengar **113** (1973) 15
Measurements of the pulse height defect and its mass dependence for heavy-ion silicon detectors, E. C. Finch and A. L. Rodgers **113** (1973) 29
An analysis of the causes of the pulse height defect and its mass dependence for heavy-ion silicon detectors, E. C. Finch **113** (1973) 41
Study of the response of silicon-barrier detectors to protons and α-particles, Robert A. Langley **113** (1973) 109
Use of a diffusion cloud chamber for an experiment on the asymmetry at small angles ($< 10°$) in the elastic scattering of 40 MeV polarized protons, G. Bendiscioli, A. Gigli Berzolari and E. Lodi Rizzini **113** (1973) 113
A shielding cave for low-level gamma experiments on Van de Graaff accelerators, George Neal, Clyde Humphrey, Rogers Ritter and W. A. Schier **113** (1973) 119
An isotope separator on-line system at a cyclotron for heavy ions (PINGIS), K. Fransson, M. Af Ugglas and Å. Engström **113** (1973) 157
Transmission efficiency of fission products in a He-jet flow system, H. Feldstein and S. Amiel **113** (1973) 181
Humidity effects in ionization chambers (*Letter to the Editor*), L. G. Bengtsson **113** (1973) 309
Charge collection in silicon detectors for strongly ionizing particles, W. Seibt, K. E. Sundström and P. A. Tove . **113** (1973) 317
Heavy-ion induced secondary electron emission – A possible method for Z-identification, H.-G. Clerc, H. J. Gehrhardt, L. Richter and K. H. Schmidt **113** (1973) 325
The amplitude dependence of the induction signal in multiwire proportional counters (*Letter to the Editor*), J. Dagan, R. Novick and M. C. Weisskopf **113** (1973) 595
Formation of current pulses in semiconductor nuclear radiation detectors (*Letter to the Editor*), Raymond N. Williams and Ewan M. Lawson **113** (1973) 597
A proton polarimeter for polarization transfer experiments, R. A. Hardekopf, D. D. Armstrong and P. W. Keaton, Jr. **114** (1974) 17
A cold-neutron spectrometer for inelastic-scattering studies, G. Castagno, M. Coppo, F. Demichelis, L. Saitta and A. Tartaglia **114** (1974) 21
The velocity dependence of the photometrically determined track width of heavy ions in Ilford G5 nuclear emulsion, L. Larsson, R. Andersson and O. Mathiesen **114** (1974) 35
Comment on "The use of a pileup rejector in quantitative pulse spectrometry" (*Letter to the Editor*), Rainer Rolle **114** (1974) 121

Answer to the comment (*Letter to the Editor*), J. Bartošek and J. Mašek **114** (1974) 12
Addendum to "Efficiency determination for some standard type Ge(Li) detectors for gamma-rays in the energy range from 0.04 to 11 MeV" (*Letter to the Editor*), H. Seyfarth **114** (1974) 12
A 2 Ge(Li) – 6 NaI(Tl) detector system for gamma–gamma directional correlation studies (*Letter to the Editor*), L. Eriksson and L. Gidefeldt **114** (1974) 12
The escape peak in Si(Li) planar detectors (*Letter to the Editor*), N. A. Dyson **114** (1974) 13
On the determination of electron energy losses in absorbers. A study of the ^{137}Cs spectrum (*Letter to the Editor*), S. C. van de Geijn **114** (1974) 13
Effect of thin absorber on fission-fragment detector calibration (*Letter to the Editor*), R. A. Lerche and B. W. Wehring **114** (1974) 13
A plastic track detector with high sensitivity (*Letter to the Editor*), H. B. Lück **114** (1974) 13
Response of NE 111 scintillator foil to transient ^{16}O ions (*Letter to the Editor*), P. Braun-Munzinger and C. K. Gelbke **114** (1974) 14
A cold neutron differential reflection spectrometer which utilizes cylindrical reflections (*Letter to the Editor*), Safdar A. Ali and N. Thomas Olson **114** (1974) 14
Proportional counter characteristics, and applications to reactor neutron spectrometry, Victor V. Verbinski and Raffaele Giovannini **114** (1974) 20
Effects of lateral displacement of the front edges in a parallel plate channel multiplier, L. P. Andersson and S. Berg **114** (1974) 23
Minority carrier injection and resistance modulation in silicon surface-barrier diodes, L. P. Andersson, A. Hyder and S. Berg **114** (1974) 23
Voltage-dependent reverse current in high resistivity silicon surface-barrier diodes, S. Berg and L. P. Andersson . **114** (1974) 24
Pulse shape in a parallel plate electron multiplier free from ion feedback, S. Berg and L. P. Andersson **114** (1974) 24
Influence of the time-of-flight spread of photoelectrons on the measurements of the shape subnanosecond light pulses in 8850 RCA photomultipliers, B. Sipp and J. A. Miehe **114** (1974) 24
Fluorescence self-absorption effect and time resolution in scintillator counters, B. Sipp and J. A. Miehe **114** (1974) 25
Bakeable ionization chamber for low-level tritium counting, Carlos A. Colmenares. **114** (1974) 26
A europium-doped, calcium-fluoride scintillator system for low-level tritium detection, C. Colmenares, E. G. Shapiro, P. E. Barry and C. T. Prevo **114** (1974) 27
Alpha-particle registration characteristics in 'Daicel' cellulose nitrate SSNTD, H. A. Khan and S. A. Durrani . **114** (1974) 29
Mössbauer birefringence rotation polarimeter, H.-D. Pfannes and U. Gonser **114** (1974) 29
A diffraction spectrometer for studies of particle excited radiative transitions, J. H. Jett, N. S. P. King, D. A. Lind and P. Henning **114** (1974) 30
Time response of plastic scintillators, P. B. Lyons and J. Stevens **114** (1974) 31
Construction and performance of a large liquid scintillation counter (*Letter to the Editor*), J. T. Dakin **114** (1974) 39
Evidence for ethylene-molecule clusters in a gas jet system (*Letter to the Editor*), W. J. Wiesehahn, J. M. D'Auria and J. C. Irwin **114** (1974) 40
Optical absorption spectra of some potentially interesting gases for Cherenkov counters, Y. Tomkiewicz and E. L. Garwin **114** (1974) 41
A mechanical time-of-flight neutron diffractometer, J. M. Carpenter, D. F. R. Mildner, C. A. Pelizzari, J. D. Sutton and J. E. Gunning **114** (1974) 41
Efficiency of ^{8}Be detection using counter telescopes with circular and rectangular collimation, A. Menchaca-Rocha **114** (1974) 42
A ^{6}Li-loaded glass detector for neutron cross-section measurements on the Harwell synchrocyclotron, W. R. McMurray, N. J. Pattenden and G. S. Valail **114** (1974) 42
Low-voltage blanking of a photomultiplier tube, D. Ben-Zeev, D. Inbar and A. Yarom **114** (1974) 51
On-line fission fragment separator using a helium jet ion source, J. P. Zirnheld **114** (1974) 51
Shielding for fast neutron scattering experiments of high sensitivity, D. W. Glasgow, D. E. Velkley, J. D. Brandenberger, M. T. McEllistrem, H. J. Hennecke and D. V. Breitenbecher **114** (1974) 52
Pulse-shape discrimination for wide dynamic range neutron scattering experiments, Dale W. Glasgow, Donald E. Velkley, Jerry D. Brandenberger and Marcus T. McEllistrem **114** (1974) 53
A high-precision neutron time-of-flight facility, D. W. Glasgow, D. E. Velkley, J. D. Brandenberger, M. T. McEllistrem, G. I. Harris, H. J. Hennecke, D. B. Breitenbecher, C. P. Poirier, J. C. Manthuruthil, W. A. Anderson, A. K. Hyder, Jr. and M. D. Centala **114** (1974) 56
An experimental technique for studying 180° scattering, M. C. Gupta and G. E. Tripard **114** (1974) 59
Recent developments in subnanosecond timing with coaxial Ge(Li) detectors, D. C. S. White and W. J. McDonald **115** (1974)
Full-energy peak efficiency of cadmium-telluride gamma-ray spectrometers, P. Siffert, J. P. Gonidec, A. Cornet, R. O. Bell and F. V. Wald **115** (1974)
Fission-track registration in solid-state track detectors immersed in fissile-material solutions, R. H. Iyer, R. Sampathkumar and N. K. Chaudhuri **115** (1974)
The carrier-loaded helium-jet transport method, Juha Äystö, Pertti Puumalainen and Kalevi Valli **115** (1974)
Identification of fission activity using thin-film detectors, W. J. McDonald, A. I. Kilvington, C. J. Batty and J. L. Weil **115** (1974) 1

A packet of ideal-crystalline lamellae as neutron monochromator, FRIEDRICH FREY . . . 115 (1974) 277
Zur Messung der Empfindlichkeitsverteilung von Photovervielfachern auf deren Eintrittsfenster (*Letter to the Editor*), H.-J. KELLERMANN, H. O. KLAGES, R. LANGKAU, U. PASCHEN und J. REMEN . . . 115 (1974) 301
Measurement of time-dependent fast neutron spectra with an NE 213 scintillator, NESTOR PIERONI, DETLEF RUSCH and ERIC WATTECAMPS . . . 115 (1974) 317
A γ-discriminating ^{3}He-semiconductor sandwich spectrometer, H. BLUHM . . . 115 (1974) 325
Field mapping the dipole magnets for the University of Colorado energy-loss spectrograph, D. E. PRULL and S. D. SCHERY . . . 115 (1974) 339
GaSe as nuclear particle detector, C. MANFREDOTTI, R. MURRI and L. VASANELLI . . . 115 (1974) 349
Pulsed bias operation for surface-barrier detector, BUNZABRO SAEKI and MASAAKI OKAMOTO . . . 115 (1974) 355
Bubble creation by electrons from tritium decay in a hydrogen bubble chamber, G. HORLITZ, S. WOLFF and G. HARIGEL 115 (1974) 365
An adjustable field shape electrostatic analyzer, T. WILSON WHITEHEAD and BRUCE Y. K. CHAO . . . 115 (1974) 381
A versatile semiconductor beta spectrometer, S. FELLMANN and B. PATT . . . 115 (1974) 413
The helium-jet technique for inaccessible sources of ^{252}Cf fission fragments and ^{228}Th decay products, H. G. WILHELM, H. JUNGCLAS, H. WOLLNIK, D. F. SNIDER, R. BRANDT and K. H. LUST . . . 115 (1974) 419
Track discrimination of low-energy nuclei in plastics, G. BARONI, S. DI LIBERTO, S. PETRERA, G. ROMANO and C. SGARBI . . . 115 (1974) 545
A high efficiency neutron detection system for photoreaction studies, E. J. DOWDY, J. T. CALDWELL and G. M. WORTH 115 (1974) 573
An investigation of the neutron detection efficiency of a plastic scintillation detector in the energy range 6 to 41 MeV, M. W. MCNAUGHTON, F. P. BRADY, W. B. BROSTE, A. L. SAGLE and S. W. JOHNSEN . . . 116 (1974) 25
Neutron-detector efficiency measurements from 7 to 14 MeV, P. LELEUX, P. C. MACQ, J. P. MEULDERS and C. PIRART 116 (1974) 41
Ein Neutronenzählkanal mit hoher zeitlicher Auflösung, K. BEHRINGER und J. PHILDIUS . . . 116 (1974) 45
A simple pulse-shape discrimination circuit, P. SPERR, H. SPIELER, M. R. MAIER and D. EVERS . . . 116 (1974) 55
Analog particle identifier with a wide dynamic range of the $E/\Delta E$ ratio, S. OHKAWA and K. HUSIMI . . . 116 (1974) 61
On the determination of the efficiency of Ge(Li) detectors near the germanium K edge (*Letter to the Editor*), B. ROSNER and D. GUR . . . 116 (1974) 171
The relative efficiency of a thin Ge(Li) detector near the K absorption edge of Ge (*Letter to the Editor*), R. D. SCOTT 116 (1974) 173
Directional dependence of energy measurements in Ge(Li) spectrometers (*Letter to the Editor*), P. C. LICHTENBERGER and I. K. MACKENZIE . . . 116 (1974) 177
Improvements in proton spectroscopy with Si(Li)-detectors by rise time discrimination (*Letter to the Editor*), G. LINDSTRÖM and R. LISDAR . . . 116 (1974) 181
A high-pressure gas cell for DSA lifetime measurements (*Letter to the Editor*), O. SCHAILE, H. GRAWE and R. KOENIG 116 (1974) 185
The efficiency versus freon content for a multiwire proportional counter having 3 mm anode wire spacing (*Letter to the Editor*), B. DIETERLE, ROBERT HEAPHY and M. K. JOHNSON . . . 116 (1974) 189
Absolute efficiency of channeltron electron multipliers for 10–100 keV X-rays (*Letter to the Editor*), FRANCO BORDONI, MASSIMO MARTINELLI, MARIO PAGANINI FIORATTI and SILVANA RICCI PIERMATTEI . . . 116 (1974) 193
A magnetically pulsed neutron time-of flight spectrometer for inelastic scattering, H. A. MOOK, F. W. SNODGRASS and D. D. BATES . . . 116 (1974) 205
"One-line" beta-recoil mass spectrometry (MAGGIE), R. D. MACFARLANE, D. F. TORGERSON, Y. FARES and C. A. HASSELL . . . 116 (1974) 381
Special glasses as energy detectors for fission fragments, J. ASCHENBACH, G. FIEDLER, H. SCHRECK-KÖLLNER and G. SIEGERT . . . 116 (1974) 389
Cycle measurement of internal conversion electron spectra using an iron magnetic spectrometer, O. DRAGOUN, V. BRABEC, V. FEIFRLÍK, A. KUKLÍK and F. DUDA . . . 116 (1974) 459
A simple cooled Si(Li) electron spectrometer, IRSHAD AHMAD and FRANK WAGNER . . . 116 (1974) 465
A spectrometer for measuring charged particles and neutrons, ALESSANDRO RINDI . . . 116 (1974) 471
A high-efficiency polarimeter for 8 to 16 MeV protons, J. F. CLARE . . . 116 (1974) 525
A parallel plate gas scintillation proportional counter for improved resolution of low-energy photons (*Letter to the Editor*), H. E. PALMER and L. A. BRABY . . . 116 (1974) 587
Semiconductor detectors setup for nuclear spectroscopy studies, H. E. BOSCH, J. DAVIDSON, M. A. FARIOLLI and V. SILBERGLEIT . . . 117 (1974) 213
Further study of timing properties of scintillation counters, J. BIAŁKOWSKI, Z. MOROZ and M. MOSZYŃSKI . . . 117 (1974) 221
Energy-transfer and light-collection characteristics for different types of plastic scintillators, B. BENGSTON and M. MOSZYŃSKI . . . 117 (1974) 227
Second version of a constant-fraction trigger redesigned with new integrated circuits and results with semiconductor detectors, MICHAEL R. MAIER and DONALD A. LANDIS . . . 117 (1974) 245
Lifetime system with stabilized timing discriminators, THOMAS M. HALL . . . 117 (1974) 253
Time-dependent polarization of CdTe gamma-ray detectors, R. O. BELL, G. ENTINE and H. B. SERREZE . . . 117 (1974) 267
A generalized figure of merit for gamma-ray polarimeters, B. A. LOGAN, R. T. JONES and A. LJUBIČIĆ . . . 117 (1974) 273
Diamond nuclear radiation detectors, S. F. KOZLOV, E. BELCARZ, M. HAGE-ALI, R. STUCK and P. SIFFERT . . . 117 (1974) 277
Gamma-ray position-sensitive coaxial Ge(Li) detector, I. S. SHERMAN and M. G. STRAUSS . . . 117 (1974) 285
Continuous high-field operation of CdTe gamma detectors with MIS-type contacts (*Letter to the Editor*), P. EICHINGER, N. HALDER and J. KEMMER . . . 117 (1974) 305

Timing and amplitude characteristics of a parallel-plate electron multiplier, S. Berg and B. Eriksson **117** (1974) 34
An automatic Compton polarimeter for gamma energies in the range 5–10 MeV, B. Arad and H. Szichman . . . **117** (1974) 35
Ion-optical design and field shaping calculations for the RPI 255° magnetic analyzer, G. C. Spaniol, T. W. Whitehead and F. A. White **117** (1974) 36
A new NaI gamma-ray spectrometer, M. D. Hasinoff, S. T. Lim, D. F. Measday and T. J. Mulligan **117** (1974) 37
Finite-size effects in neutron detectors. J. W. Watson and R. G. Graves **117** (1974) 54
Regeneration of neutron-damaged Ge(Li) detectors inside the cryostat (*Letter to the Editor*), R. Baader, W. Patzner and H. Wohlfarth **117** (1974) 60
Un système de contrôle automatique de gain pour les détecteurs à scintillation (*Letter to the Editor*), Gérard Haouat et Didier Gimat **117** (1974) 61
Production of a clean neutron gas for decay and scattering experiments, R. Dobrozemsky **118** (1974)
Analog signal processing for the thick radiator neutron spectrometer, K. N. Geller, N. Klein and R. V. Kollarits . **118** (1974) 3
Boron compounds for thermal-neutron detection, K. P. Ananthanarayanan, P. J. Gielisse and A. Choudry . . **118** (1974) 4
Anode surface area and ageing of self-quenching (argon–methylal) GM counters, A. Peeva and T. Karatoteva . **118** (1974) 4
Quenching analysis of liquid scintillation, M. Takiue and H. Ishikawa **118** (1974) 5
Production d'un flux gamma monoénergétique à l'aide d'un accélérateur Van de Graaff de 2 MeV, André Paul Sorriaux, André Rubio et Joselyne Boudet **118** (1974) 21
A multiple beta–single gamma detector assembly for low-level coincidence spectroscopy, S. Niese, W. Görner and H. Kleeberg **118** (1974) 21
Detection of soft X-rays with a xenon proportional scintillation counter, A. J. P. L. Policarpo, M. A. F. Alves, M. Salete S. C. P. Leite and M. C. M. Dos Santos **118** (1974) 22
Correction for counting losses in multichannel time analyzers, Stefan Chwaszczewski and Andrzej T. Mikulski . **118** (1974) 22
Automatic gain control circuit for scintillation probe with plastic scintillator, B. Machaj **118** (1974) 23
Long-time behaviour of Si(Li) detectors, M. Słapa **118** (1974) 23
Improvements to resistive-wire focal-plane detector (*Letter to the Editor*), H. Homeyer, J. Mahoney and B. G. Harvey **118** (1974) 31
A high-resolution mass-identification system for heavy ions, B. Zeidman, W. Henning and D. G. Kovar **118** (1974) 36
Automatic corrections for deadtime effects and lineshape changes due to source decay in positron-annihilation experiments, D. C. Tennant, P. Martel, W. J. L. Buyers and S. M. Kim **118** (1974) 36
A neutron monitor with a rotating rhodium disk, F. Braumandl, K. Schreckenbach and T. Von Egidy **118** (1974) 38
n-Type cadmium telluride surface-barrier nuclear radiation detectors, A. J. Dąbrowski, J. Iwańczyk and R. Triboulet **118** (1974) 53
Semiconductor contacts to silicon surface-barrier detectors, L. P. Andersson, A. Hyder and M. Misra . . . **118** (1974) 53
A 1 Ge(Li)–3 NaI(Tl) detector system for γ–γ angular correlation measurements, T. Hayashi, S. Uehara and T. Seo . **118** (1974) 54
Messung der Geometriefaktoren von Ge(Li) Detektoren, B. Grosswendt und E. Waibel **118** (1974) 54
Efficiencies and response functions of NaI(Tl) crystals for gamma rays from thick disk sources, M. Belluscio, R. De Leo, A. Pantaleo and A. Vox **118** (1974) 55
Short-lived radioactivity induced in Ge(Li) gamma-ray detectors by neutrons, R. L. Bunting and J. J. Kraushaar **118** (1974) 56
Electronic processes in liquid xenon (*Letter to the Editor*), S. E. Derenzo, T. S. Mast, H. Zaklad and R. A. Muller **118** (1974) 61
Comments on: Electronic processes in liquid xenon (*Letter to the Editor*), J. Prunier, R. Allemand, M. Laval and G. Thomas **118** (1974) 61
Rapid production of thin Kr sources (*Letter to the Editor*), A. J. Houdayer, S. K. Mark and R. B. Moore . . . **118** (1974) 61
The performance of single charged-particle detectors under isotropic irradiation, A. A. Kolchin, V. V. Lebedev and G. P. Skrebtsov **119** (1974) 9
Performance of a heavy-ion time-of-flight spectrometer, T. M. Cormier, R. S. Galik, E. R. Cosman and A. J. Lazzarini **119** (1974) 14
Semiconductor counters for nuclear radiations produced by ion implantation, S. Peterström and G. Holmén . . . **119** (1974) 15
Preliminary results on mercuric iodide nuclear radiation detectors (*Letter to the Editor*), J. P. Ponpon, R. Stuck, P. Siffert and C. Schwab **119** (1974) 19
The resolution function for the rotating-crystal spectrometer, N. C. Popa **119** (1974) 22
Dead-time calibrator, V. Zídek and J. Plch **119** (1974) 24
Spectrometer for on-line analysis of radionuclides (SOLAR), J. J. Stoffels **119** (1974) 29
Luminescence response of thin plastic scintillator detectors to fission fragments from proton-induced fission of ^{232}Th, ^{235}U, and ^{238}U, L. Muga, A. Clem, G. Griffith, H. S. Plendl, R. Eaker and R. Holub **119** (1974) 29
Effect of electrons and X-rays on alpha-particle registration in T-Cellit detector, M. Várnagy, J. Csikai and S. Szegedi **119** (1974) 26
Further measurement of the track lengths of heavy ions in mica, H. Blok, F. Hanappe, F. M. Kiely, B. D. Pate and J. Péter **119** (1974) 30
A summing Ge(Li)-Compton spectrometer, V. B. Ivanov and V. I. Shipilov **119** (1974) 31
Energy spectrometry of protons by means of a dielectric track detector (*Letter to the Editor*), H. B. Lück **119** (1974) 40
Wavelength shifters for xenon proportional scintillation counters (*Letter to the Editor*), M. A. F. Alves, M. C. M. Dos Santos and A. J. P. L. Policarpo **119** (1974) 40

Application of T-Cellit detector for the study of ^{6,7}Li(p, α) ^{3,4}He reactions, M. Várnagy, J. Csikai, J. Szabó, S. Szegedi and J. Bánhalmi **119** (1974) 451
A double-scintillator time-of-flight spectrometer, W. J. Paterson and J. Redfearn **119** (1974) 463
Studies of a fast-timing, large-diameter photomultiplier as a fast neutron detector, Tomonari Otsubo **119** (1974) 569
The penetration of heavy charged particles through gallium arsenide detectors, H. V. Gupta and A. K. Chaubey . . **119** (1974) 573
A new detector assembly for conversion electrons and X-rays from Mössbauer effect, Y. Isozumi, D.-I. Lee and I. Kádár **120** (1974) 23
A ^{8}Be identifier and its application to the (α, ^{8}Be) reaction, G. J. Wozniak, N. A. Jelley and Joseph Cerny **120** (1974) 29
The performance of charged-particle telescopes under isotropic irradiation, A. A. Kolchin, V. V. Lebedev and G. P. Skrebtsov **120** (1974) 55
Circuit de déclenchement, avec réjection du bruit, pour mesures temporelles à basse énergie avec compteurs NaI(Tl), R. van Zurk, F. B. Lopes et J. Ros **120** (1974) 61
The BEMS-2 on-line isotope separator at the JINR heavy-ion cyclotron, V. A. Karnaukhov, D. D. Bogdanov, A. V. Demyanov, G. I. Koval and L. A. Petrov **120** (1974) 69
Transport of recoil atoms in a stream of liquid-air-cooled pure helium, Juha Äystö, Seppo Hillebrand, Karl-Heinz Hellmuth and Kalevi Valli **120** (1974) 163
I. Transmission of reaction products through capillary tubes, J. P. Zirnheld **120** (1974) 171
II. Transmission of reaction products through a nozzle–skimmer system, J. P. Zirnheld **120** (1974) 179
A device for the preparation of composite crystal samples *(Letter to the Editor)*, E. Legrand, S. Hautecler and L. Vansteelandt **120** (1974) 197
A new technique for the measurement of photoneutron angular distributions, B. H. Patrick and E. M. Bowey . . . **120** (1974) 245
A neutron-spectrum monitor with annular radiator and axial recoil detector, G. S. Sidhu and J. B. Czirr **120** (1974) 251
Pulse-shape discrimination applied to the scintillating-target technique, U. von Moellendorff and R. J. Slobodrian **120** (1974) 257
The plasma effect in silicon semiconductor radiation detectors, Raymond N. Williams and Ewan M. Lawson . . . **120** (1974) 261
A time-of-flight facility for the measurement of electron-induced neutron spectra, Helge Schier and Berthold Schoch **120** (1974) 269
Position-determining scintillator, John F. Arens **120** (1974) 275
Complete identification of heavy ions by means of a time-of-flight spectrometer with ΔE ionization chamber, A. Gamp, W. Bohne, P. Braun-Munzinger and C. K. Gelbke **120** (1974) 281
A computerized piezoelectric Mössbauer spectrometer, K. P. Schmidt, M. Huyse, J. De Raedt, G. Langouche, M. van Rossum and R. Coussement **120** (1974) 287
Method of electromagnetic separation of radioactive isotopes of rare-earth elements directly from targets, A. Latuszyński, K. Zuber, J. Zuber, A. Potempa and W. Żuk **120** (1974) 321
Time resolution in X-ray–heavy-ion coincidence measurements as a function of the X-ray energy, H. Schmidt-Böcking, I. Tserruya, H. Zekl and K. Bethge **120** (1974) 329
An adaptation of the pulser method for the determination of losses in counting short-lived nuclides *(Letter to the Editor)*, W. Görner **120** (1974) 363
Biased magnetic quadrupole spectrometer for high-resolution charged-particle mass identification, G. W. Hoffmann, J. McIntyre, M. Mahlab and W. R. Coker **120** (1974) 489
A position-sensitive semi-proportional chamber for ultra-soft X-rays, G. Auriemma, F. Giovannelli, M. Mastropietro and P. Ubertini **120** (1974) 497
Zur Verwendung einkristalliner Fasern in Neutronenbeugungsexperimenten *(Letter to the Editor)*, Anton Zeilinger **120** (1974) 525
A new method for monitoring the threshold of a large neutron scintillation counter *(Letter to the Editor)*, A. Christ, G. Nöldeke, W. Nuding and T. Reichelt **120** (1974) 527
Effective solid angle of detecting ^{8}Be nuclei with a dual detector system *(Letter to the Editor)*, J. Schimizu, K. Fujii, K. Takimoto and J. Muto **120** (1974) 529
Fluorescence risetime of NE 102 scintillator *(Letter to the Editor)*, A. J. Campillo, R. C. Hyer and S. L. Shapiro **120** (1974) 533
An ultra-thin-window gas cell *(Letter to the Editor)*, Helmut Laumer, Cary N. Davids, Sam M. Austin and Lolo M. Panggabean **120** (1974) 535

Methods for Nuclear Spectroscopy

Differential cross section determinations in extended geometry with an incident particle continuum, J. C. Overley and D. H. Ehlers **111** (1973) 13
Accurate formulae for the calculation of high energy electron bremsstrahlung spectra, J. L. Matthews and R. O. Owens **111** (1973) 157
Precision measurement of gamma ray energies from ^{238}U daughters, II, T. E. Sampson **111** (1973) 209
On the measurement of the small-angle scattering of fast neutrons, W. Bucher, C. Hollandsworth and R. Lamoreaux **111** (1973) 237
Organic scintillator neutron detector efficiency: A comparison of experimental results with predictions, R. Plasek, D. Miljanić, V. Valković, R. B. Liebert and G. C. Phillips **111** (1973) 251
Anisotropic effects in neutron slowing down time experiments, T. D. Beynon and M. Coleman **111** (1973) 253

An experimental study for stabilizing a spectrum with no reference peaks, M. Matoba, Y. Matsumoto and M. Hyakutake **111** (1973) 259
The neutron spectrum of Am-Be neutron sources, A. D. Vijaya and Arun Kumar **111** (1973) 435

Proceedings of the first international summer school on radionuclide metrology

I. *General review papers*

Some remarks on the development of metrology, A. Milojević **112** (1973) 1
Needs for radioactivity standards and measurements in different fields, L. M. Cavallo, B. M. Coursey, S. B. Garfinkel, J. M. R. Hutchinson and W. B. Mann **112** (1973) 5
Needs for nuclear data in radionuclide metrology, B. Grinberg **112** (1973) 19
Some general aspects of radioactivity measurement methods, A. Spernol **112** (1973) 23
Some aspects of atomic effects in nuclear transitions, B. Crasemann **112** (1973) 35
The work of the BIPM Consultative Committee for Measurement Standards of Ionizing Radiations Section II: Radionuclide Measurements, P. J. Campion **112** (1973) 41
Dead-time problems, J. W. Müller **112** (1973) 47

II. *Proportional gas counting*

Present status in the field of internal gas counting, S. B. Garfinkel, W. B. Mann, F. J. Schima and M. P. Unterweger **112** (1973) 59
Internal gas counting method for absolute measurements of the specific radioactivity of tritiated water, M. Hadžišehović, I. Močilnik, DJ. Bek-Uzarov and A. Milojević **112** (1973) 69
Possibility of application of metallic uranium as a reducing agent for tritiated water, M. Hadžišehović, A. Milojević, DJ. Bek-Uzarov and I. Močilnik **112** (1973) 73
Spurious pulses in proportional counters: a review, P. J. Campion **112** (1973) 75
Single electron detection in proportional gas counters, H. Genz **112** (1973) 83
Pulse height distribution in low energy proportional counter measurements, B. Breyer **112** (1973) 91
Pressurized proportional counters for coincidence measurements, A. P. Baerg **112** (1973) 99
High-pressure 4π proportional counter for internal conversion electron measurements (^{139}Ce, ^{109}Cd, ^{99}Tc^{m}), J. Legrand, M. Blondel and P. Magnier **112** (1973) 101
On selected problems in the field of proportional counters, W. Bambynek **112** (1973) 103

III. *Liquid scintillation counting*

Present status in the field of precision liquid scintillation counting, R. Vaninbroukx and J. Stanef **112** (1973) 11
Elementary mechanisms in liquid scintillation counting, J. Klein **112** (1973) 11
Probability of non-detection in liquid scintillation counting, H. Houtermans **112** (1973) 12
Afterpulses in liquid scintillation counters, A. Williams and D. Smith **112** (1973) 13
Special problems involved in liquid scintillation counting, standardization of ^{87}Y and ^{67}Ga, J. Steyn **112** (1973) 13

IV. *Coincidence counting*

The efficiency extrapolation method in coincidence counting, A. P. Baerg **112** (1973) 14
Accuracy of coincidence measurements, L. Grigorescu **112** (1973) 15
Tracer method for pure beta emitter measurement, J. Steyn **112** (1973) 15
On sources of systematic errors in efficiency tracer measurements, G. C. Lowenthal **112** (1973) 16
Problems and possibilities of brehmsstrahlung counting, A. Spernol, E. De Roost and M. Mutterer **112** (1973) 16
Some special problems in coincidence measurement, J. P. Pérolat **112** (1973) 17
Sum-peak counting with two crystals, J. M. R. Hutchinson, W. B. Mann and P. A. Mullen **112** (1973) 18
The use of sources made on electrosprayed pads of ion exchange resins for efficiency tracer measurements, G. C. Lowenthal, V. Page and H. A. Wyllie **112** (1973) 19
Proportional and scintillation counters used in coincidence counting, DJ. Bek-Uzarov **112** (1973) 20
The "SAMAR" shared-dead-time method. A new approach, J. E. De Carlos and C. E. Granados **112** (1973) 20
The National Bureau of Standards $4\pi\beta$-γ coincidence-counting and γ-ray intercomparator automatic sample changers, S. B. Garfinkel, W. B. Mann and J. L. Pararas **112** (1973) 21

V. *γ-ray, X-ray counting and spectrometry problems*

Current state of the art in semiconductor detectors, G. Bertolini, F. Cappellani and G. Restelli **112** (1973) 21
Calibration of γ spectrometers, J. Legrand **112** (1973) 22
Efficiency calibration of semiconductor detectors in the X-ray region, S. J. Hansen, J. C. Mc George and R. W. Fink **112** (1973) 23
Radioactive X-ray standards, R. W. Fink **112** (1973) 24
Determination of peak area, L. Kokta **112** (1973) 24
Automatic analysis of gamma-ray spectra, I. A. Slavić **112** (1973) 25
Alpha-particle energy standards, A. Rytz **112** (1973) 26

VI. *Special methods*

Recent developments in calorimetric measurements of radioactivity, H. Ramthun . . . **112** (1973) 265
Radioactive calorimetry, a review of the work at the National Bureau of Standards, W. B. Mann . . . **112** (1973) 273
Multiwire counting, J. Pahor and M. Hribar . . . **112** (1973) 279
Correlation techniques in radioactivity measurement, A. Williams, V. E. Lewis and D. Smith . . . **112** (1973) 285
$4\pi\,\gamma$-ionization chamber measurements, H. M. Weiss . . . **112** (1973) 291
Precise measurement of small currents, K. Zsdánszky . . . **112** (1973) 299
Low-level radioactivity measurements, J. M. R. Hutchinson, W. B. Mann and R. W. Perkins . . . **112** (1973) 305
Nondestructive determination of radionuclides in lunar samples using a large low-background gamma-ray spectrometer and a novel application of least-squares fitting, J. S. Eldridge, G. D. O'Kelley, K. J. Northcutt and E. Schonfeld . . . **112** (1973) 319
Use of ^{56}Mn to check measuring equipment, F. Lagoutine and J. Legrand . . . **112** (1973) 323

VII. *Source preparation and related problems*

Present status in quantitative source preparation, Janet S. Merritt . . . **112** (1973) 325
Problems in microweighing, Y. Le Gallic . . . **112** (1973) 333
Preparation of thin sources, a review, W. Van der Eijk, W. Oldenhof and W. Zehner . . . **112** (1973) 343
Special methods of source preparation, G. C. Lowenthal and H. A. Wyllie . . . **112** (1973) 353
Preparation of monomolecular radioactive sources, Lj. Dobrilović and M. Simović . . . **112** (1973) 359
The storage of radioactive solutions with standardised disintegration rates, G. C. Lowenthal and H. A. Wyllie . . . **112** (1973) 367

VIII. *Statement of data and errors*

Statement of results of experiments and their accuracy, A. Williams, P. J. Campion and J. E. Burns . . . **112** (1973) 373
Statistical methods applicable to counting experiments and evaluation of experimental data, H. H. Ku . . . **112** (1973) 377
Treatment of errors in low-activity measurements, M. Hilaire . . . **112** (1973) 385
Round Table Discussion on Statement of Data and Errors . . . **112** (1973) 391
School Summary . . . **112** (1973) 397

Pulse-shape discrimination in the proportional counting of tritium betas, S. Sudár, L. Vas and T. Biró . . . **112** (1973) 399
Kinematics and phase space for two-particle correlations in three-, four-, and five-particle final state reactions, W. T. H. Van Oers, Mahavir Jain and S. N. Bunker . . . **112** (1973) 405
Determination of natural radioactivity in rare earth metals, H. A. Grench and R. A. Buchanan . . . **112** (1973) 415
Electron capture in beam-foil spectroscopy, Chau-Chin Wei . . . **112** (1973) 423
Asymmetry of Mössbauer lines due to the finite dimensions of the source, K. P. Mitrofanov and V. P. Gor'kov . **112** (1973) 427
Radiative energy transfer of liquid scintillation, H. Ishikawa and M. Takiue . . . **112** (1973) 431
Liquid scintillation measurement for β-ray emitters followed by γ-rays, H. Ishikawa and M. Takiue . . . **112** (1973) 437
Scattering of γ-rays by germanium K-shell electrons. Experimental setup, M. Pradoux, H. Meunier, J. Bauman and G. Roche . . . **112** (1973) 443
A method for correcting the influence of escaping external brehmsstrahlung on β-spectra measured with 4π solid-state spectrometers, W. Wiesner, D. Flothmann and H. J. Gils . . . **112** (1973) 449
The quantitative analysis of multi-layer absorbers by Mössbauer transmission spectrometry, John Bainbridge . . **112** (1973) 495
Corrections for positon annihilation in flight in nuclear spectrometry, J. Kantele and M. Valkonen . . . **112** (1973) 501
Single and double escape peaks in Ge(Li) gamma-ray spectra (*Letter to the Editor*), John R. Johnson and Kenneth C. Mann . . . **112** (1973) 601
Recoil properties obtained from gamma-ray spectra of gross fission products (*Letter to the Editor*), Bent Schrøder . . **112** (1973) 603
Charged particle mass identification by energy-time-of-flight technique, E. Andrade, D. Rendić, V. A. Otte and G. C. Phillips . . . **113** (1973) 93
A simple method for estimating maximum cross sections for (α,xn)- and (p,xn)-reactions, H. F. Röhm, H. Münzel and J. Lange . . . **113** (1973) 101
Improved quality of some sources of linearly polarized photons (*Letter to the Editor*), W. R. Dixon, R. S. Storey, A. Ljubičić, R. T. Jones and B. A. Logan . . . **113** (1973) 149
Measurement of the dead-time in a multichannel analyser (*Letter to the Editor*), L. Mortensen and J. Olsen . . **113** (1973) 151
A simple algorithm for detection of significantly broad peaks (*Letter to the Editor*), Z. Kosina . . . **113** (1973) 153
Neutron spectroscopy in the energy range 10–500 keV using the ^{6}Li sandwich detector, I. C. Rickard . . . **113** (1973) 169
An investigation of the reproducibility of the ^{6}Li semiconductor sandwich technique, I. C. Rickard . . . **113** (1973) 175
The effect of channel width in determining centroid shifts, D. A. Hutcheon . . . **113** (1973) 221
Distortion in the measurement of time-interval distributions (*Letter to the Editor*), P. B. Coates . . . **113** (1973) 311
The analyzing power of silicon from 4 MeV to 16 MeV, J. P. Martin, J. L. Foster, H. R. Hiddleston and S. E. Darden . . . **113** (1973) 477
Subtraction of the background and automatic peak identification in gamma-ray spectra obtained from a Ge(Li) detector, N. G. Volkov . . . **113** (1973) 483
Mesures de vies moyennes en ligne sur faisceau d'ions lourds dans la gamme de la microseconde, G. Albouy, J. C. David, J. M. Lagrange, M. Pautrat, C. Roulet, H. Sergolle et J. Vanhorenbeeck . . . **113** (1973) 509

Thickness effect on the K_α/K_β ratio of tin (*Letter to the Editor*), R. E. Mohler and C. R. Cothern **113** (1973) 599
Back-scatter Mössbauer studies using conversion electrons – ^{119}Sn, C. M. Yagnik, R. A. Mazak and R. L. Collins **114** (1974) 1
Small-angle inelastic scattering of 40 MeV protons by ^{12}C, ^{40}Ca, ^{56}Fe and ^{58}Ni, D. Ingham, R. Eisberg, M. Makino and C. Waddell **114** (1974) 5
Isomer activation data from experiments by high activity ^{60}Co sources, L. Lakosi, M. Csürös and A. Veres . . . **114** (1974) 13
Solid-angle correction factors for Ge(Li) detectors, A. Roy and K. V. K. Iyengar **114** (1974) 29
Mesure de faibles sections efficaces de fission à l'aide de détecteurs à barrière de surface, C. Cabot, C. Ngô, J. Péter et B. Tamain **114** (1974) 41
Effects of finite dimensions in source-detector solid-angle evaluation (*Letter to the Editor*), M. Belluscio, R. de Leo, A. Pantaleo and A. Vox **114** (1974) 145
Calculation of the corrected geometry factor in the coincidence measurement of β^+-annihilation γ-rays (*Letter to the Editor*), T. Nakajima **114** (1974) 149
Transmission of lead-capture gamma rays with a tin absorber (*Letter to the Editor*), Y. Kawarasaki **114** (1974) 153
Preparation and linewidth of ^{125}Sb(Cu) Mössbauer sources (*Letter to the Editor*), Punit Boolchand. **114** (1974) 159
Non-resonant background and recoil-free fraction of a $BaSnO_3$ ^{119m}Sn Mössbauer source (*Letter to the Editor*), J. Sitek **114** (1974) 163
Automatic measurement of excitation functions by continuous beam-energy modulation, M. R. Wormald and J. Takacs **114** (1974) 263
Preparation of ^{252}Cf neutron and fission-fragment sources, H. L. Adair and P. R. Kuehn **114** (1974) 327
Gamma-ray linear-polarization and angular-distribution formulas for mixtures of three multipoles, R. Vaillancourt and P. Taras **114** (1974) 333
Conversion-electron spectroscopy of short-lived nuclides, D. R. Zolnowski and T. T. Sugihara **114** (1974) 341
The γ-ray PAD pattern in the presence of two isomeric levels, S. Nagamiya **114** (1974) 349
The shape of spectral lines: Analytic deconvolution and matching of Peyre–Principi profiles (*Letter to the Editor*), H. D. Middendorf **114** (1974) 397
On the investigations of the D(n,2n)p reaction at 14 MeV, G. E. Thompson, Ivo Šlaus, Jules W. Sunier, J. W. Verba, D. J. Margaziotis and J. C. Young **114** (1974) 439
Detection of fission isomers with half-lives in the picosecond range by the recoil-distance technique, V. Metag, E. Liukkonen, G. Sletten, O. Glomset and S. Bjørnholm **114** (1974) 445
Static approximation distortions and neutron time-of-flight diffraction using the Harwell linac, R. N. Sinclair and A. C. Wright **114** (1974) 451
A method of correction for false and accidental events in $\gamma\gamma$-coincidence experiments, Bernward W. Huber and Klaus Krämer **114** (1974) 509
Range and energy loss rate for heavy ions in Makrofol and cellulose nitrate, Jacques Tripier, Gérard Remy, Jarno Ralarosy, Monique Debeauvais, Roland Stein and Daniel Huss **115** (1974) 29
A calibration procedure for the response of silicon surface-barrier detectors to heavy ions, S. B. Kaufman, E. P. Steinberg, B. D. Wilkins, J. Unik, A. J. Gorski and M. J. Fluss **115** (1974) 47
Delayed coincidence measurements using semiconductor detectors, R. J. Bishop **115** (1974) 61
Measuring nuclear excitation energies and Q-values with a cyclotron–magnetic spectrograph system, J. A. Nolen, Jr., G. Hamilton, E. Kashy and I. D. Proctor **115** (1974) 189
Utilization of internal pair formation for multipolarity analysis, R. Pepelnik, U. Fanger and W. Michaelis . . . **115** (1974) 285
Background reduction in X-ray fluorescence spectra using polarization (*Letter to the Editor*), T. G. Dzubay, B. V. Jarrett and J. M. Jaklevic **115** (1974) 297
Cross-section measurements with a neutron generator, S. Mubarakmand, M. Ahmad, M. Anwar and M. S. Chaudhry **115** (1974) 345
Identification and spectrometry of charged particles produced in reactions induced by 14 MeV neutrons, J. P. Perroud Ch. Sellem and J. F. Loude **115** (1974) 357
Depth selective Mössbauer-effect measurements by means of scattered electrons, U. Bäverstam, T. Ekdahl, Ch. Bohm, B. Ringström, V. Stefánsson and D. Liljequist **115** (1974) 373
A technique for recoil distance lifetime measurements, E. Arai, M. Ogawa and S. Ohtani. **115** (1974) 397
Lifetime measurements of excited states in ^{219}Rn by observation of conversion-electron Doppler shifts following α-decay, B. Richter, V. Martini, W.-D. Schneider, L. Ley and V. Schöner **115** (1974) 401
A shape function of photopeaks for gamma-ray spectrum analysis with Ge(Li) detectors, M. Dojo **115** (1974) 425
Determination of the true width of photonuclear resonances, R. E. Kirkman, R. Koch, H. Stock and H. H. Thies **115** (1974) 539
Calculated photopeak efficiencies of NaI-crystals for a 4π-detecting geometry, R. Rieppo. **115** (1974) 541
Study of the use of particle channeling in time-of-flight fission-fragment mass-yield measurements, W. J. Sullivan and B. W. Wehring. **116** (1974) 29
Radionuclide emitters for positron-annihilation studies of condensed matter, J. L. Campbell, T. E. Jackman, I. K. MacKenzie, C. W. Schulte and C. G. White. **116** (1974) 369
Time-differential perturbed angular correlations and the recoil-distance method, K. Hagemeyer **116** (1974) 397
On the shape of the photopeak in a NaI(Tl) scintillation detector (*Letter to the Editor*), T. S. Mudhole and N. Umakantha **116** (1974) 401

A new 14 MeV neutron time-of-flight spectrometer at the Kyushu University (*Letter to the Editor*), M. Matoba, M. Hyakutake, T. Tonai, J. Niidome, Y. Matsumoto and N. Kimura . . . **116** (1974) 405
On-line gamma-efficiency calibration using fission-produced ^{138}Xe and ^{138}Cs sources, E. Achterberg, F. C. Iglesias, A. E. Jech, J. A. Moragues, D. Otero, M. L. Perez, A. N. Proto, J. J. Rossi and W. Scheuer . . . **116** (1974) 453
^{160}Tb, ^{182}Ta, and ^{192}Ir as efficiency calibration standards for Ge(Li) detectors, N. Lavi . . . **116** (1974) 457
A method for the zero-channel determination in neutron time-of-flight spectrometry, M. Adib, M. Salama, A. Abdel-Kawi and I. Hamouda . . . **116** (1974) 509
Internal-source method of measuring absolute pair-production cross sections, F. T. Avignone III and S. M. Blankenship . . . **116** (1974) 515
Internal conversion measurements in ^{207}Pb using a combination magnetic–Si(Li) spectrometer, F. T. Avignone III **116** (1974) 521
On the use of gamma rays from inelastic scattering for the measurement of neutron slowing-down times in the submicrosecond region, T. D. Beynon and J. Walker . . . **117** (1974) 177
The precision determination of some γ-ray energies using the Fribourg curved-crystal spectrometer, W. Beer and Jean Kern . . . **117** (1974) 183
Precision half-life measurements using Ge(Li) detectors, G. Azuelos, J. E. Crawford and J. E. Kitching . . . **117** (1974) 233
The dependence of Ge(Li) timing information on gamma-ray intensity distributions, P. G. Coulter, H. C. Evans and B. C. Robertson . . . **117** (1974) 239
Effect of finite time-resolution on the time-differential directional correlation, S. Morinobu and H. Ikegami . . . **117** (1974) 249
Über eine Methode zur Bestimmung kleiner Halbwertzeiten in strömenden Systemen, K. Bächmann und H. Klonk **117** (1974) 261
The intrinsic scintillation efficiency of plastic scintillators for ^{60}Co gamma excitation, Delynn Clark . . . **117** (1974) 295
Note on "Resolution in experiments of angular correlation of annihilation photons" (*Letter to the Editor*), A. T. Stewart . . . **117** (1974) 309
Recoil-free fraction and maximum resonance cross section of ^{119m}Sn in a Mössbauer $BaSnO_3$ source employing a Si(Li) detector, Rajinder Kumar Puri . . . **117** (1974) 381
Detection of proton-induced boron X-rays with a Si(Li) detector, R. G. Musket . . . **117** (1974) 385
Neutron diffraction intensities from vibrating double-crystal systems, Edward S. Kenney, Jeffery D. E. Jefferies and Alan M. Jacobs . . . **117** (1974) 391
Americium-241 as a low-energy photon intensity standard, J. L. Campbell and L. A. McNelles . . . **117** (1974) 519
Investigation of gamma-ray spectra from the inelastic scattering of reactor fast neutrons, M. R. Ahmed, Kh. I. Shakarchi, S. Al-Najjar, M. A. Al-Amili, L. I. Govor and A. M. Demidov . . . **117** (1974) 533
Identification of heavy ions in AgCl monocrystals by means of multiple Coulomb scattering, Iuliana M. Cincheza, Erwin M. Friedländer and Dumitru Gh. Haşeganu . . . **118** (1974) 55
Energy-loss fluctuation of heavy charged particles in silicon absorbers, V. V. Avdeichikov, E. A. Ganza and O. V. Lozhkin . . . **118** (1974) 247
Effect of the electron-momentum distribution on the shape of the Compton edge of Si(Li) detectors, J. Felsteiner, S. Kahane and B. Rosner . . . **118** (1974) 253
Application of an integration counting method to Mössbauer spectroscopy of gold, M. P. A. Viegers and J. M. Trooster . . . **118** (1974) 257
Energy distribution of output electrons in a curved channel multiplier, Daniel Loubet and Claude Barat . . . **118** (1974) 259
A simple method for the analysis of depth-selective Mössbauer-effect measurements (*Letter to the Editor*), U. Bäverstam, T. Ekdahl, C. Bohm, D. Liljequist and B. Ringström . . . **118** (1974) 313
A comparison of polarization values for D–D neutrons obtained from Mott–Schwinger and ^{4}He scattering, R. M. A. Maayouf and R. B. Galloway . . . **118** (1974) 343
The determination of the differential energy loss of heavy ions backscattered from an infinitely thick solid target, H. Schmidt-Böcking, G. Ruhle and K. Bethge . . . **118** (1974) 357
Doppler shape of a γ-line in Coulomb excitation, K. I. Erokhina, I. Kh. Lemberg and A. A. Pasternack . . . **118** (1974) 373
Dispersion en énergie de deutons lors de leur passage à travers la matière, G. Weber et L. Quaglia . . . **118** (1974) 573
Isotopic conversion in gadolinium-exposure neutron imaging, A. A. Harms and G. McCormack . . . **118** (1974) 583
Intensities of γ-rays in the decay of ^{166m}Ho (*Letter to the Editor*), E. W. A. Lingeman, F. W. M. De Boer and B. J. Meijer . . . **118** (1974) 609
A simple method of orientating single crystals on time-of-flight neutron spectrometers, W. Minor, A. Rajca and T. Giebułtowicz . . . **119** (1974) 141
Atomic-beam measurements on refractory elements. Nuclear spin measurements of ^{99}Mo and ^{99m}Tc, H. Rubinsztein, I. Lindgren, L. Lindström, H. Riedl and A. Rosén . . . **119** (1974) 269
Some features in the dependence of the pulse-height defect in semiconductor detectors on detected particle energy, S. A. Kassirov, G. G. Kovshevny, A. A. Kotov, V. R. Resnik, G. E. Solyakin and N. K. Terent'ev . . . **119** (1974) 301
Problems of exposure measurement with extended sources; Case of X-ray fluorescence, J. L. Chartier, D. Roman and A. Bazoge . . . **119** (1974) 427
A new method of time-of-flight spectroscopy with an incompletely pulsed cyclotron beam, B. Siebert and R. Jahr . **119** (1974) 445
Measurement of nuclear magnetic moments by perturbed polarization-directional angular correlations, Takayoshi Aoki and Jian-Zhi Ruan(gen) . . . **119** (1974) 477
Improved methods for absolute cross-section determinations in nuclear reactions, K. Schulte, W. Kühl and H. Paetz gen. Schieck . . . **119** (1974) 581

Possible sources of polarized X-rays for X-ray fluorescence spectra with reduced backgrounds, R. H. Howell and W. L. Pickles . . . **120** (1974) 187
Fast calibration of large Si(Li) electron detectors from 511.0 to 4564.0 keV using double-escape peaks and Compton edges from ^{66}Ga *(Letter to the Editor)*, R. B. Firestone, R. A. Warner, Wm. C. McHarris and W. H. Kelly . **120** (1974) 199
Bandgap dependence of the average energy required for electron–hole pair creation in GaAs and in Si *(Letter to the Editor)*, Reginald D. Ryan . . . **120** (1974) 201
Neutron paramagnetic scattering with a pulsed neutron source of an electron linac, N. Watanabe, Y. Ishikawa and K. Tsuzuki . . . **120** (1974) 293
Delayed neutron emission from separated fission products, G. Rudstam, S. Shalev and O. C. Jonsson . . . **120** (1974) 333
Measurement of ^{129}I by liquid scintillation and NaI(Tl) scintillation methods, Donald L. Horrocks . . . **120** (1974) 345
Relative efficiency calibration of a Si(Li) electron spectrometer, L. J. Jardine and C. M. Lederer . . . **120** (1974) 515
Range and multiple-scattering measurements of low-energy muons, T. D. Lagerlund, M. Blecher, K. Gotow, R. Keller and W. C. Lam . . . **120** (1974) 521

Numerical and Data Analysis

OSCAR: A multiprogrammed small computer system for experimental nuclear physics, S. L. Blatt, J. W. D. Sinclair and L. A. Raymond . . . **111** (1973) 53
A real-time 448000-channel multiparameter pulse-height analysis system, J. W. D. Sinclair, J. W. Smith, C. M. Rozsa and S. L. Blatt . . . **111** (1973) 61
Description of a digital controller, C. B. Brooks and S. Centro . . . **111** (1973) 275
Mechanism of secondary electron multiplication within a curved channel multiplier, Daniel Loubet and Claude Barat . . . **111** (1973) 441
DAMIT: A small computer optical model code for pion scattering, E. V. Hungerford III . . . **111** (1973) 509
Registration of a nonstationary Poisson process with fixed dead-time systems, Franjo Jović . . . **111** (1973) 519
Korrektion des Einflusses von Absorption und Mehrfachstreuung im Streukörper auf das Energiespektrum unelastisch gestreuter schneller Neutronen, D. Hermsdorf und K. Seidel . . . **112** (1973) 469
CAMAC branch driver: A particular solution, M. Bernede, G. De Grandi, J. Kalisz, L. Stanchi, P. Bettini and A. Neglia . . . **112** (1973) 527
Applying symbolic formula manipulation to the problem on non-linear least squares, J. R. Wolberg and J. Isenberg **112** (1973) 533
Event selection in a proportional-chamber array using lookup tables, Rudolph Gabriel . . . **112** (1973) 539
A modular data acquisition system for multiwire proportional chambers, M. Cavalli-Sforza and D. C. Cheng . **113** (1973) 81
A computer system for realtime control and data processing at a cyclotron laboratory, B. Mertens and V. Kaltenbach . . . **113** (1973) 125
Visualisation polychrome par mosaïque, A. Muser et J. R. Lutz . . . **113** (1973) 131
Reconstruction of particle multiplicity distributions using the method of statistical regularization, M. Dakowski, Yu. A. Lazarev, V. F. Turchin and L. S. Turovtseva . . . **113** (1973) 195
Description and performance of an interactive bubble chamber analysis system using an HPD, H. J. Mück, H. H. Nagel and F. Selonke . . . **113** (1973) 267
Stopping powers and ranges for muons, charged pions, protons, and heavy ions (*Letter to the Editor*), T. W. Armstrong and K. C. Chandler . . . **113** (1973) 313
A track fitting method for particles in non-uniform magnetic fields, Michael W. Peters . . . **113** (1973) 371
Deep penetration hadron cascade calculations and comparisons to measurements in iron at 24 GeV/c, K. Goebel, J. Ranft and J. T. Routti . . . **113** (1973) 433
Traitement numérique d'un spectre γ à l'aide d'un calculateur programmable de bureau, Michel Fedoroff, Julienne Blouri et Gilles Revel . . . **113** (1973) 589
A Monte-Carlo simulation of the capture and detection of neutrons with large liquid scintillators, J. Poitou and C. Signarbieux . . . **114** (1974) 113
Comment on "Fit to experimental data with exponential functions using the fast Fourier transform" (*Letter to the Editor*), Michael R. Smith and Sorin Cohn-Sfetcu . . . **114** (1974) 171
Poisson and non-Poisson behavior of radioactive systems (*Letter to the Editor*), Norman A. Frigerio . . . **114** (1974) 175
The effect of different total atomic scattering cross sections on DSAM calculations (*Letter to the Editor*), B. M. Latta and P. J. Scanlon . . . **114** (1974) 179
Fast retrace of particle orbits through a large, inhomogeneous magnetic field, R. J. McKee. . . . **114** (1974) 321
Velocity dependence of low recoil velocity Doppler shift attenuation measurements, B. C. Robertson and J. R. Leslie . . . **114** (1974) 389
BINIT – A versatile particle identification computer code for off-line analysis of detector telescope data, E. T. Chulick, M. N. Namboodiri, G. W. Smith, S. Munden, C. Schnatterly and J. B. Natowitz . . . **114** (1974) 503
Computer control system using the H. P. Basic language for the storage-ring Adone, M. Matera, S. Tazzari and G. Vignola . . . **115** (1974) 89
Correction of experimental results in fission experiments. I. Dispersion corrections, A. Gavron . . . **115** (1974) 93
Correction of experimental results in fission experiments. II. Neutron yield corrections, A. Gavron . . . **115** (1974) 99

The statistical analysis of γ-ray angular correlation experiments, A. N. James, P. J. Twin and P. A. Butler . . . **115** (1974) 105
A correction to the "Kurz" neutron detector efficiency code, S. A. Elbakr, J. W. Watson and C. A. Miller . . **115** (1974) 115
Computation of the Goudsmit–Saunderson distribution in electron transport, Dave Walter Vande Putte **115** (1974) 117
Experimental data on photopeak integration methods in activation analysis, J. Hertogen, J. de Donder and R. Gijbels . . . **115** (1974) 197
A shape function of photopeaks for gamma-ray spectrum analysis with Ge(Li) detectors, M. Dojo **115** (1974) 425
Momentum analysis by using a quintic spline model for the track, H. Wind **115** (1974) 431
Analysis of three-body events in $\gamma + D \rightarrow \pi^- + p + p$, D. Blum, J. Boucrot, W. McGill, B. Grossetête and H. Nguyen Ngoc . . . **115** (1974) 563
Neutron-detector efficiency measurements from 7 to 14 MeV, P. Leleux, P. C. Macq, J. P. Meulders and C. Pirart **116** (1974) 41
Berechnung der Elektronen-Bremsstrahlspektren in NaJ, CsJ, Si und Ge, B. Grosswendt **116** (1974) 97
The analysis of gamma–gamma directional correlations in a triple cascade, G. Y. Chow, P. L. Gardulski and M. L. Wiedenbeck . . . **116** (1974) 105
Spectres d'impulsions à « un photoélectron » des photomultiplicateurs, Jean-Pierre Ballini **116** (1974) 109
A note on determining resonance widths in the presence of Gaussian errors, J. G. McEwen and G. J. Daniell . **116** (1974) 169
The simulation of backscattering, part I. Description of the simulation model and program, D. K. Hutchence and S. Hontzeas . . . **116** (1974) 217
The simulation of backscattering, part II. The classical isotope effect, D. K. Hutchence and S. Hontzeas **116** (1974) 229
The realization of a statistical description for complex spectra, A. H. Colenbrander and T. J. Kennett **116** (1974) 237
The application of a statistical description for complex spectra to the (n,γ) reaction, A. H. Colenbrander and T. J. Kennett . . . **116** (1974) 251
Simple correction for Q-meter measurement of proton target polarization, John J. Hill and Daniel A. Hill . . **116** (1974) 269
Calculation of the activation rate of a cylindrical sample irradiated by a cylindrical fast neutron source, Hiroshi Goth, Hideyuki Yagi, Katsuhei Kobayashi and Itsuro Kimura . . . **116** (1974) 361
Track recognition code for a magnetic multiparticle spectrometer, D. R. Gilbert, W. N. Schreiner, W. P. Trower and P. Schübelin . . . **116** (1974) 501
A computerized measuring system for neutron physics experiments, Gudmar Grosshög **116** (1974) 561
Program for least squares fitting of Mössbauer spectra in applied magnetic fields, G. Lang and B. W. Dale . . . **116** (1974) 567
Influence of absorber thickness on the Mössbauer quadrupole spectrum of ^{121}Sb, G. K. Shenoy and J. M. Friedt **116** (1974) 573
A Monte-Carlo method for calculation of the distribution of ionization losses, K. A. Ispirian, A. T. Margarian and A. M. Zverev . . . **117** (1974) 125
A fast on-line selection system for particle trajectories detected by multiwire proportional chambers, D. Aebischer, R. Bovet, B. Favier, G. Greeniaus, R. Hess, A. Junod, C. Lechanoine, B. Mauron, J. C. Niklès, D. Rapin, J. P. Vittet and D. W. Werren . . . **117** (1974) 131
Effects of bulk density on calculated neutron log response, Joseph R. Hearst **117** (1974) 141
On the calculation of the self-absorption in spherical radioactive sources, J.-P. François **117** (1974) 153
Anwendung der Bateman-Gleichungen zur Berechnung von Aktivitäten beim Transport in strömenden Systemen, K. Bächmann, K. Büttner und B. Neidhart . . . **117** (1974) 397
Some formulae for a dead-time-distorted Poisson process, Jörg W. Müller **117** (1974) 401
Restoration of hum-contaminated correlation functions, A. T. Mikulski and W. Seifritz **117** (1974) 405
The solid angle subtended by a solid, right, circular cylinder as seen from a point in space, Michael V. Green, Roger L. Aamodt and Gerald S. Johnston . . . **117** (1974) 409
Recoil-distance data analysis for incompletely resolved stopped and in-flight components, P. Engelstein, M. Forterre, N. Schulz and J. P. Vivien . . . **117** (1974) 413
Data simulation techniques for reactions of the form X (a, bc) Y, ..., M. J. Fritts and P. D. Parker **117** (1974) 415
An efficient read-out system for multiwire proportional counter hodoscopes, Robert W. Austin and William J. Selig . . . **117** (1974) 429
Système de lecture de chambres proportionnelles à fils, J. D. Berst, Y. Chatelus, J. M. Meyer, G. Metzger et G. Schultz . . . **117** (1974) 513
Finite-size effects in neutron detectors, J. W. Watson and R. G. Graves **117** (1974) 541
The use of a small digital computer in position digitising and servo control of film measuring machines, D. B. Miller, D. R. Price and J. Stark . . . **117** (1974) 551
A scratch pad memory for buffering multiwire proportional chamber data, David Brown **117** (1974) 561
The mean of several quotients of two measured variables (*Letter to the Editor*), Arie Bodek **117** (1974) 613
Monte Carlo comparison of hydrogen cold-neutron sources in radial and tangential beam-tube arrangements, H. Kalli . . . **118** (1974) 61
Extended working range for electron beams in atmosphere. Part I: Theoretical calculations, Richard Cecil Smith and Berthold W. Schumacher . . . **118** (1974) 73
Two computer programs for ray-tracing of charged particles with space-charge effects in variable external fields, Arianer Joël and Ton That Tuan . . . **118** (1974) 93
Backscattering of positrons from thick targets, V. A. Kuzminikh, I. A. Tsekhanovski and S. A. Vorobiev **118** (1974) 269
A digital method for reactor-period measurement, Sergio G. Mundim **118** (1974) 273
A data sorting and processing system for photoneutron research, H. Tourwé, J. Uyttenhove and R. Van De Vijver **118** (1974) 279

Fast digital coder connected with the CAMAC dataway for hodoscope systems, S. G. Basiladze and Z. Guzik . **118** (1974) 285
A study of ion paths in curved parallel-plate electron multipliers with perpendicular magnetic field, Robert B. Janney and P. A. Tove . . . **118** (1974) 509
Efficiencies and response functions of NaI(Tl) crystals for gamma rays from thick disk sources, M. Belluscio, R. De Leo, A. Pantaleo and A. Vox . . . **118** (1974) 553
Système de test des modules CAMAC, J. M. Meyer, J. D. Berst et G. Metzger . . . **118** (1974) 589
A method of on-line spectra evaluation by means of a small computer employing Fourier transforms, K. J. Blinowska and E. F. Wessner . . . **118** (1974) 597
Computation of potential in a multiwire proportional counter of arbitrary cross-section, George T. Symm . . . **118** (1974) 605
The effect of fragment anisotropy on fission-chamber efficiency, Gary W. Carlson . . . **119** (1974) 97
A correlation chopper or chopper with coding disk, A. Graffstein . . . **119** (1974) 101
Development of a CAMAC crate controller for connection to a computer CDC 1700, Jens Moritz and Hartwig Sindt . . . **119** (1974) 107
A perturbation method for calculating the rate of charge collection in a semiconductor detector, L. A. El-Kharadly and M. Y. El-Ibiary . . . **119** (1974) 113
Transmission and reflection of electrons by foils, S. M. Seltzer and M. J. Berger . . . **119** (1974) 157
Spherical harmonic analysis of satellite anisotropy measurements, T. R. Sanderson and D. E. Page . . . **119** (1974) 177
Monte Carlo computation for isotopic analysis of cosmic rays by means of the earth's magnetic field, P. Hubert . . **119** (1974) 183
The resolution function for the rotating-crystal spectrometer, N. C. Popa . . . **119** (1974) 237
A simple time optimal digital control for nuclear reactors, Carlos Enrique D'Attellis, José raúl Lorenzetti and Carlos Héctor Reyes . . . **119** (1974) 295
Logarithmic digital–analog conversion for varying parameters in CAMAC devices, K. Andert, F. Gabriel and V. A. Shuravin . . . **119** (1974) 361
Low-dead-time delay-line read-out for position-sensitive proportional counters, A. N. Andersen, R. J. Barrett and E. A. Wadlinger . . . **119** (1974) 365
A Monte Carlo program for the calculation of gamma-ray spectra for germanium detectors, Ch. Meixner . . . **119** (1974) 521
Small-angle multiple scattering of ions in the screened Coulomb region, P. Sigmund and K. B. Winterbon . . . **119** (1974) 541
Light-attenuation effects in the calculation of scintillation neutron-counter response functions and detection efficiencies, R. De Leo, G. D'Erasmo, A. Pantaleo and G. Russo . . . **119** (1974) 559
Calculation of the current of an ionization chamber exposed to a pulsed electromagnetic radiation field and comparison with measurements, H. Dinter and K. Tesch . . . **120** (1974) 113
An efficient method for the analysis of data from perturbed angular correlation and multiple-lifetime experiments, Chr. Bargholtz . . . **120** (1974) 121
A method for energy-loss and range calculations based on empirical approximations, Clyde S. Zaidins . . . **120** (1974) 125
Direct computation on the kinetic spectrophotometry, Johnny W. Hansen and Per Broen Pedersen . . . **120** (1974) 131
Track parametrization in the CERN split-field magnet, J. J. Aubert and C. Broll . . . **120** (1974) 137
Numerical calculation of the time-dependent Mössbauer transmission, J. C. Dehaes . . . **120** (1974) 301
Use of correlation counting in visual scanning, J. S. Ausländer and R. Rehak . . . **120** (1974) 465
Multiple-scattering corrections in backward scattering of neutrons, B. Minetti and A. Pasquarelli . . . **120** (1974) 509
Method of analysis of conversion spectra in the study of atomic environment *(Letter to the Editor)*, M. Fujioka and T. Shinohara . . . **120** (1974) 547

Nuclear Electronics

A two mode high speed time analyzer with a plated wire memory, Itsuro Kimura . . . **111** (1973) 169
Étude des transferts de données dans la branche CAMAC, J. M. Meyer, D. Mlynek et G. Metzger . . . **111** (1973) 263
A pulse amplifier for nuclear instrumentation, L. J. Herbst . . . **111** (1973) 269
A discriminator for use with NaI(Tl) detectors at high counting rates, Allen P. Mills, Jr. . . . **111** (1973) 365
Discrimination system analysis for high resolution spectroscopy, N. Abbattista, A. de Giorgio, D. Marino and V. L. Plantamura . . . **111** (1973) 587
Reduction of afterpulsing in a photo-multiplier, S. J. Hall and J. McKeown . . . **112** (1973) 545
A time-invariant linear technique for producing signals with fast recovery time, N. Taccetti and M. Boccio-lini . . . **113** (1973) 69
A 12 bit analog-to-digital converter for pulse height analysis, G. P. Westphal . . . **113** (1973) 77
A light coupled stage in the CAMAC highway system, W. Tebra and B. van Randeraat . . . **113** (1973) 201
A period detection instrument for nuclear reactor safety systems, Gordon K. Rusch and William P. McDowell . . . **113** (1973) 207
A simple differential discriminator (*Letter to the Editor*), J. M. Rochelle . . . **113** (1973) 315
A proton-resonance magnetic field stabilizer using a frequency stabilizer, I. Kumabe, A. Takiguchi and H. Nakamura . . . **113** (1973) 387
A mechanical resonance detector for multiwire proportional chambers, R. L. Chase . . . **113** (1973) 395
Logarithmic charge amplifier for scintillation detectors, V. Radeka . . . **113** (1973) 401

A fast charge-sensitive preamplifier for soft X-ray astronomy applications of multiwire proportional chambers (*Letter to the Editor*), G. Auriemma, F. Giovannelli and C. Mengucci . . . **113** (1973) 473
Constant current regulator for fast recharging of high voltage energy storage capacitors (*Letter to the Editor*), R. W. Findley and J. S. Russ . . . **113** (1973) 615
A neutron-multiplicity sorter for the experimental determination of $\bar{\nu}$, G. M. Worth, J. T. Caldwell and E. J. Dowdy . . . **114** (1974) 71
A pulser-controlled dual window unit for use in gain stabilization of scintillation detectors, Mikio Yamashita . . **114** (1974) 75
Universal decision making device for on-line data selection in scattering experiments, Z. Guzik and S. G. Basiladze . . . **114** (1974) 83
A highly linear fast sampling system for non-recurring pulses, Edgar V. Shrum, William A. Stephens and Klaus O. H. Ziock . . . **114** (1974) 87
Spectrum generator using a random sampling technique (*Letter to the Editor*), W. R. Falk . . . **114** (1974) 187
A single-pulse integrator (*Letter to the Editor*), Arne Miller . . . **114** (1974) 189
An inexpensive timing single channel pulse height analyzer (*Letter to the Editor*), Albert M. Gottlieb . . . **114** (1974) 193
A frequency-to-flux density readout converter for the HVEC automatic tracking NMR fluxmeter (*Letter to the Editor*), D. A. S. Walker . . . **114** (1974) 195
A terminal stabilizer for a tandem accelerator, J. E. Cairns, M. W. Greene and J. A. Kuehner . . . **114** (1974) 489
Data selection and readout for driftchambers, B. Schürlein, W. Farr, H. W. Siebert and A. H. Walenta . . . **114** (1974) 587
A readout system for multi-wire proportional chambers, H. Haggerty, R. Handler, G. Smith and W. Wilke . . **115** (1974) 157
Détermination de vies moyennes à l'aide d'un corrélateur digital en temps réel, J. Danière, R. Rougny, E. Descroix, D. Charnay, R. Billery et H. Chevalier . . . **115** (1974) 165
A radiation-activated sensor, J. C. Nirschl . . . **115** (1974) 173
A low-cost sub-nanosecond pulse amplifier, M. Moore, G. Newton and P. Pollard . . . **115** (1974) 181
A multichannel storage capacitor system for processing of fast simultaneous signals (*Letter to the Editor*), Atsushi Ogata . . . **115** (1974) 313
General interface circuit for time-of-flight measurements with cold neutrons, M. Coppo, G. Maino and S. Villa . **115** (1974) 393
A new peak stretcher for pulse-height analysis, G. P. Westphal . . . **115** (1974) 509
Ein Neutronenzählkanal mit hoher zeitlicher Auflösung, K. Behringer und J. Phildius . . . **116** (1974) 45
A simple pulse-shape discrimination circuit, P. Sperr, H. Spieler, M. R. Maier and D. Evers . . . **116** (1974) 55
Analog particle identifier with a wide dynamic range of the $E/\Delta E$ ratio, S. Ohkawa and K. Husimi . . . **116** (1974) 61
Fast and stable logarithmic converter employing resistance matching, S. Ohkawa and K. Husimi . . . **116** (1974) 71
Digital steuerbare Stromversorgung mit automatischem Entmagnetisierungsprogramm für magnetische Spektrometer, S. Fellmann, B. Patt, R. Thielmann und T. Kobrzynski . . . **116** (1974) 77
Filters for use in pulse-area sensing systems, J. A. Connelly and J. F. Pierce . . . **116** (1974) 85
The accurate measurement of cable delays, Alan R. Wilson . . . **116** (1974) 93
Use of a univibrator with clear to simplify the logic of a differential discriminator (*Letter to the Editor*), Ryszard Bayer . . . **116** (1974) 199
A time compensator for large scintillation counters, J. Faust and R. S. Larsen . . . **116** (1974) 365
A simple spectrum monitor for $E \times B$ velocity filters (*Letter to the Editor*), H. Ryssel, H. Müller and K. Schmid . **116** (1974) 593
Tunnel-diode comparator with controlled hysteresis (*Letter to the Editor*), P. Ghelfan . . . **116** (1974) 611
Second version of a constant-fraction trigger redesigned with new integrated circuits and results with semiconductor detectors, Michael R. Maier and Donald A. Landis . . . **117** (1974) 245
Lifetime system with stabilized timing discriminators, Thomas M. Hall . . . **117** (1974) 253
Un système de contrôle automatique de gain pour les détecteurs à scintillation (*Letter to the Editor*), Gérard Haouat et Didier Gimat . . . **117** (1974) 611
A portable four-decade logarithmic G.M. survey meter, H. J. Fraser . . . **118** (1974) 263
Automatic corrections for deadtime effects and lineshape changes due to source decay in positron-annihilation experiments, D. C. Tennant, P. Martel, W. J. L. Buyers and S. M. Kim . . . **118** (1974) 367
Reference pulsers for calibration purposes, Pier Francesco Manfredi, Piero Maranesi and Vincenzo Varoli . **118** (1974) 487
A fast neutron-gamma discriminator (*Letter to the Editor*), P. Betz, G. Braun, G. Hammel and J. Urban . . . **119** (1974) 199
8192-Channel square-root pulse-height analyzer, W. R. Binns and H. C. Carpenter . . . **119** (1974) 355
Rise-time jitter reduction in timing and amplitude-discrimination circuits (*Letter to the Editor*), N. Abbattista, B. Marangelli, D. Marino and V. L. Plantamura . . . **119** (1974) 407
Triple constant-fraction discriminator, W. J. McDonald and D. C. S. White . . . **119** (1974) 527
Étude et réalisation d'une matrice de décision utilisant la propagation des signaux dans des lignes à retard à portes ECL, Y. Chatelus, P. Herzog et G. Schultz . . . **119** (1974) 589
A fast 6-bit ADC, S. Centro . . . **119** (1974) 595
DIDO – A most versatile pattern-unit with fast discriminator inputs and CAMAC- /PERSEUS-output facilities, Henner Quehl, Hans-Joachim Stuckenberg and Holger Brechtel . . . **120** (1974) 41
Pulse-shape discrimination applied to the scintillating-target technique, U. von Moellendorff and R. J. Slobodrian **120** (1974) 257
Straight-section approximation for the range function in a particle identifier, J. E. Sluiters and S. S. Klein . . . **120** (1974) 305
An adaptation of the pulser method for the determination of losses in counting short-lived nuclides (*Letter to the Editor*), W. Görner . . . **120** (1974) 363

An economical method for measuring high voltages in a large counter system, ROLLAND P. JOHNSON, R. N. KRASNOKUTSKY, YU. V. MIKHAILOV, V. N. MOROZOV, YU. D. PROKOSHKIN and R. S. SHUVALOV **120** (1974) 389

Nuclear Methods Applied to Other Fields

The detection and recording of thermally stimulated exoelectrons, A. MORENO Y MORENO **111** (1973) 21
Response of cells to fast neutrons, stopped pions, and heavy ion beams, ROBERT KATZ and S. C. SHARMA . . . **111** (1973) 93
The French-U.S. cosmic ray experiment in the Mont Blanc tunnel, W. R. SHELDON, A. R. BAZER-BACHI, GILBERT VEDRENNE, CLAUDE DUNET, MICHEL MONCHANT, ANDRÉ ST. MARC, W. G. CANTRELL and N. M. DULLER . **111** (1973) 133
The migma principle of controlled fusion, BOGDAN C. MAGLICH **111** (1973) 213
Reactor gamma heat measurements with calorimeters and thermoluminescence dosimeters, K. HAACK and B. MAJBORN **111** (1973) 283
Cosmic ray isotope resolution obtained using a new Cherenkov – total energy – dE/dx telescope, W. R. WEBBER, J. A. LEZNIAK and J. KISH **111** (1973) 301
A large acceptance pion channel for cancer therapy, D. BOYD, H. A. SCHWETTMAN and J. SIMPSON **111** (1973) 315
Méthode de dosage simultané du carbone et de l'oxygène à la surface des métaux par la réaction (t, p) à basse énergie, JEAN-NOËL BARRANDON et RAYMOND SELTZ **111** (1973) 595
Use of the nuclear reaction $^{16}O(d, \alpha)^{14}N$ in the microanalysis of oxide surface layers, A. TUROS, L. WIELUŃSKI and A. BARCZ **111** (1973) 605
An X-ray filter for proportional counter, H. M. HORSTMAN, G. VENTURA and G. R. VESPIGNANI **112** (1973) 567
Measurement of integrated intensities in inelastic neutron scattering, J. SKALYO, JR. and N. A. LURIE **112** (1973) 571
A photometer for profile measurements and charge identification on short tracks of heavy nuclei stopping in nuclear emulsion, L. JACOBSSON, G. JÖNSSON, K. SÖDERSTRÖM and H. HÅKANSSON **112** (1973) 575
An automated radiochemical technique for measurement of impurity concentration profiles, G. RESTELLI, F. GIRARDI, F. MOUSTY and A. OSTIDICH **112** (1973) 581
Field corrector for proportional counters (*Letter to the Editor*), H. M. HORSTMAN, G. VENTURA and G. R. VESPIGNANI . **112** (1973) 619
The annealing of latent damage trails in solid-state nuclear track detectors, H. A. KHAN and S. A. DURRANI . . **113** (1973) 51
Fast-neutron dosimetry by solid-state track detectors, HAMEED AHMED KHAN **113** (1973) 55
A general approach to the calibration of a Ge(Li) gamma spectrometry system for measurement of environmental and biological samples, Y. LAICHTER, A. NOTEA and N. H. SHAFRIR **113** (1973) 61
On the calculation of electric field gradient distributions in perturbed angular correlation measurements (*Letter to the Editor*), H. ZMORA, L. M. LOWE and W. V. PRESTWICH **113** (1973) 155
Low pressure spark chamber, Y. ŌHASHI **113** (1973) 217
The toroidal condenser. I. Calculation to any order of the electrostatic potential, LÉONARD BOLDUC, MARCEL BARIL and MICHEL DE CELLES **113** (1973) 225
The toroidal condenser. II. Distribution in the plane of symmetry – The equipotentials – The r^{α} case, LÉONARD BOLDUC, MARCEL BARIL and MICHEL DE CELLES **113** (1973) 235
Aperture determination for a multiple-magnet momentum spectrometer-telescope, P. J. GREEN, T. A. NAGY and C. E. MAGNUSON **113** (1973) 241
A simple magnetic spectrometer for cosmic ray studies to 300 GV, R. L. GOLDEN, J. H. ADAMS, T. M. K. MARAR, W. R. BOYKIN, J. R. MARBACH, W. R. NEUMANN, C. L. DENEY, R. E. HINTZ, H.H. HECKMAN and P. J. LINDSTROM **113** (1973) 349
Performance of a large streamer chamber in extensive air showers, A. S. KANOFSKY, M. TUTIN and K. W. CHEN . **113** (1973) 363
Apparatus for surface microanalysis by nuclear reactions with automatic energy scanning, A. BARCZ, A. BIEŃKOWSKI, A. TUROS, L. WIELUŃSKI and L. ZEMŁO **113** (1973) 413
Isotopic carbon analysis using low energy protons, D. A. CLOSE, J. J. MALANIFY and C. J. UMBARGER **113** (1973) 561
A large ionization chamber used as an alpha spectrometer for uranium/thorium dating, S. A. CHRISTER HÖGBERG and JOHN E. GUSTAVSSON **113** (1973) 573
An ionization chamber for ^{222}Rn measurements, S. A. CHRISTER HÖGBERG and JOHN E. GUSTAVSSON **113** (1973) 583
Fast-neutron response characteristics of TSEE dosimeters (*Letter to the Editor*), KLAUS BECKER and M. ABD-EL RAZEK **113** (1973) 611
Aktivierungsanalysen mit kurzlebigen Nukliden und Kernzuständen, F. GRASS **114** (1974) 49
The usefulness of mica and quartz track detectors at high environmental temperatures, HAMEED AHMED KHAN . . **114** (1974) 61
Rapid determination of multi-elements in thin specimens by X-ray spectrometry, HIROSHI TOMINAGA. **114** (1974) 65
A method for quantitative X-ray fluorescence analysis in the nanogram region (*Letter to the Editor*), HANNES AIGINGER and PETER WOBRAUSCHEK **114** (1974) 157
Two-channel comparative method of energy spectrum evaluation in measurements using gamma-ray backscattering (*Letter to the Editor*), J. ŠEDA and L. MUSÍLEK **114** (1974) 183
α-Spectroscopy as a tool to measure very small diffusion coefficients, A. HÖH and HJ. MATZKE **114** (1974) 459
Use of the D-D reaction to locate deuterium implanted in metals, P. B. JOHNSON **114** (1974) 467
New system for activation analysis with thick-target, 110-MeV electron bremsstrahlung, ENZO RICCI **114** (1974) 477
Transfer matrix of the toroidal electrostatic mirror in a second-order approximation including the aberrations off the symmetry plane, MICHEL DE CELLES **114** (1974) 557

Trace element analysis using proton-induced X-ray emission spectroscopy, V. Valković, R. B. Liebert, T. Zabel, H. T. Larson, D. Miljanić, R. M. Wheeler and G. C. Phillips . . . **114** (1974) 573
Sensitivities of some photographic films and screens for proton radiography, Richard F. Eilbert and A. M. Koehler . . . **114** (1974) 581
Fast aqueous chemistry on-line with cyclotron-produced activities using a helium-jet recoil-transport system, K. L. Kosanke, Wm. C. McHarris, R. A. Warner and W. H. Kelly . . . **115** (1974) 151
A cosmic ray telescope used to search for massive and/or fractionally charged particles, C. R. Alcock, A. Chisholm, M. Tyndel and P. C. M. Yock . . . **115** (1974) 245
Characteristics of cesium iodide for use as a particle discriminator for high-energy cosmic rays, Carol Jo Crannell, Richard J. Kurz and Walter Viehmann . . . **115** (1974) 253
Etching behaviour of a cellulose nitrate plastic detector under various etching conditions, W. Enge, K. Grabisch, R. Beaujean and K.-P. Bartholmä . . . **115** (1974) 263
Non-destructive measurement of hydrogen in thin sheet materials, O. N. Jarvis and A. C. Sherwood . . . **115** (1974) 271
Measurements of the gas constants for various proportional-counter gas mixtures, Richard S. Wolff . . . **115** (1974) 461
Borehole analysis for copper and nickel using gamma-ray resonance scattering, B. D. Sowerby and W. K. Ellis . **115** (1974) 511
Gamma dosimetry with ultraviolet-transmitting plexiglas, M. N. Bassim . . . **115** (1974) 525
A scintillation counter for use in a telescope for gamma-ray astronomy, R. D. Andresen, I. Arens, B. G. Taylor and R. D. Wills . . . **115** (1974) 531
A facility for calibrations and short experiments with heavy ions at the Bevatron, Douglas E. Greiner, Peter J. Lindstrom, Fred S. Bieser and H. H. Heckman . . . **116** (1974) 21
Fast- and epithermal-neutron flux measurement, N. Lavi and Z. Fishelzon . . . **116** (1974) 123
The synchrotron as a radiation standard for the vacuum ultraviolet, D. Rusbüldt and K. Thimm . . . **116** (1974) 125
The alignment of wire spark chambers in a cosmic-ray magnetic spectrometer by muons traversing the zero-field region, G. Bella and Y. Yeivin . . . **116** (1974) 141
A magnetic spectrometer for nuclear microanalysis of concentration distributions, W. W. Lindstrom and A. H. Heuer . . . **116** (1974) 145
Electron-beam initiated release of thermonuclear energy (*Letter to the Editor*), Charles M. Bowden, Jerry W. Hagood, Ralph L. Norman and Joe Shelton . . . **116** (1974) 201
The simulation of backscattering, part II. The classical isotope effect, D. K. Hutchence and S. Hontzeas . . . **116** (1974) 229
A magnetic monopole detector, L. Karlsson . . . **116** (1974) 275
Optical transmission measurements on monocrystalline and polycrystalline cesium iodide, Walter Viehmann, John F. Arens and Manfred Simon . . . **116** (1974) 283
Large-area silicon semiconductor detector telescope for identification of primary cosmic-ray isotopes, Shigeo Nakagawa, Masahiro Tsukuda, Kiyoaki Okudaira, Yo Hirasima, Masato Yoshimori, Hiroyuki Murakami and Masaki Koyama . . . **116** (1974) 297
A tagged gamma-ray beam for the calibration of instruments for gamma-ray astronomy, H. Christ, F. Peters, G. F. Bignami, J. J. Burger, W. Hermsen, J. A. Paul, E. Pfeffermann, B. G. Taylor, W. H. Voges and R. D. Wills . . . **116** (1974) 477
Proton induced X-ray emission as a tool for trace element analysis, E. Folkmann, C. Gaarde, T. Huus and K. Kemp **116** (1974) 487
Trace element determination using a high yield electromagnetic isotope separator and neutron activation – The determination of cadmium, Harry L. Rook, Philip D. la Fleur and James E. Suddueth . . . **116** (1974) 579
Diameter evolution of proton tracks in a cellulose nitrate detector (*Letter to the Editor*), H. B. Lück . . . **116** (1974) 613
A thermal and fast neutron monitor for use in a subcritical facility (*Letter to the Editor*), L. Birstein, P. Martínez, A. Filevich and F. Li . . . **116** (1974) 615
Precautions in the measurement of tritium concentrations in air when using flow-through ion chambers, John R. Waters . . . **117** (1974) 39
Neutron self-shielding factors for tantalum in the energy range of 45 eV to 50 keV, H. Krinninger, E. Ruppert and L. Hintze . . . **117** (1974) 45
Operational experience with the automatic lead-spectrometer facility for nuclear safeguards, H. Krinninger, E. Ruppert and H. Siefkes . . . **117** (1974) 61
A sealed controlled-environment chamber for polymer grafting with electron accelerators, S. Amdur, G. Waldner and L. A. Rajbenbach . . . **117** (1974) 85
Response of $CaSO_4$(Dy) phosphor to neutrons, P. S. Weng and K. M. Chen . . . **117** (1974) 89
Estimation of gamma-ray exposure in mixed gamma–neutron fields by ^{6}LiF and ^{7}LiF thermoluminescence dosimeters in pair use, Shun-ichi Tanaka and Yutaka Furuta . . . **117** (1974) 93
Shaped scintillation detector systems for measurements of gamma-ray flux anisotropy, J. I. Trombka, J. I. Vette, F. W. Stecker, E. L. Eller and W. T. Wildes . . . **117** (1974) 99
In-depth localization of beta-emitting isotopes. Dependence of the range of applicability upon maximum energy and complexity of the spectrum, S. C. van de Geijn . . . **117** (1974) 109
Low-background Ge(Li) detector systems for radioenvironmental studies, David C. Camp, Christopher Gatrousis and Louis A. Maynard . . . **117** (1974) 189
An energy calorimeter for a cosmic gamma-ray detector (*Letter to the Editor*), R. K. Sood, G. K. Rochester and P. G. Clayton . . . **117** (1974) 311

Problems encountered in the use of neutron methods for elemental analysis on planetary surfaces, F. Senftle, P. Philbin, R. Moxham, G. Boynton and J. Trombka . . . **117** (1974) 435
Structural studies of amorphous materials using a pulsed neutron source, R. N. Sinclair, D. A. G. Johnson, J. C. Dore, J. H. Clarke and A. C. Wright . . . **117** (1974) 445
An automatic counting system for activation analysis, J. C. Sens, J. C. Pfleger, A. Pape and R. Armbruster . . . **117** (1974) 455
The gas-jet recoil transport method as part of a system for rapid aqueous radiochemical separations, D. C. Aumann and D. Weismann . . . **117** (1974) 459
A dynamically regulated levitation electrometer used in a search for fractional charges, E. D. Garris and K. O. H. Ziock . . . **117** (1974) 467
The interaction of neutrons with fluorine in NE-226, C. M. Bartle . . . **117** (1974) 569
Determination of radon daughters' disequilibrium in air by gamma spectrometry, C. Rangarajan, V. R. Chandrasekaran, Smt. S. Gopalakrishnan and C. D. Eapen . . . **117** (1974) 573
Thin layers composition and impurities determination using low energy proton X-ray excitation. Applications to chalcogenide films stoichiometry and boron purification control, Jean Paul Thomas, Louis Porte, Jean Engerran, Jean Claude Viala and Jean Tousset . . . **117** (1974) 579
Measurement of low levels of normal uranium in water and urine by liquid scintillation alpha counting, Donald L. Horrocks . . . **117** (1974) 589
Photon self-absorption effects: A potentially large error in passive gamma-ray assays, R. A. Forster and C. J. Umbarger . . . **117** (1974) 597
Investigations on metal converters for gamma-ray detection and mapping, U. Shimoni, B. Sheinfux, A. Seidman, J. Grinberg and Z. Avrahami . . . **117** (1974) 599
An examination of carbon diffusion profiles in steel specimens by means of the nuclear microprobe, T. B. Pierce, J. W. McMillan, P. F. Peck and I. G. Jones . . . **118** (1974) 115
A multiple beta–single gamma detector assembly for low-level coincidence spectroscopy, S. Niese, W. Görner and H. Kleeberg . . . **118** (1974) 217
Operational characteristics of low-pressure neon flash tubes, Deba Prasad Bhattacharyya . . . **118** (1974) 289
Nitrogen isotopic analysis using low-energy protons, J. J. Malanify and D. A. Close . . . **118** (1974) 293
Estimation of the plasma characteristic quantities from the electromagnetic signals obtained in tokamak experiments, Kazuo Toi and Tatsuoki Takeda . . . **118** (1974) 299
Fast-neutron personnel dosimetry with solid-state track recorders, Raymond Gold, Roland J. Armani, Gordon K. Rusch and Thomas J. Yule . . . **118** (1974) 383
The Apollo gamma-ray spectrometer, Timothy M. Harrington, J. Howard Marshall, James R. Arnold, Laurence E. Peterson, Jacob I. Trombka and Albert E. Metzger . . . **118** (1974) 401
Study of total-absorption counters for very-high-energy particles, Antonio Baroncelli . . . **118** (1974) 445
Dispositif expérimental pour la spectrométrie des électrons et des protons de 0,4 à 30 keV à bord du satellite AURÉOLE, J. C. Guyader, J. Bouyssou, J. Crasnier et J. A. Sauvaud . . . **118** (1974) 497
Charge-state and energy distributions of xenon ions in carbon, Rephael Loew . . . **118** (1974) 505
Calculated particle-production spectra from π^- captures in tissue, tissue-equivalent plastic, silicon, and germanium, T. W. Armstrong and K. C. Chandler . . . **118** (1974) 515
Neutrons from the 2 MeV deuteron bombardment of thick ^{7}Li targets, D. T. L. Jones and C. M. Bartle . . . **118** (1974) 525
Sensitivity in trace-element analysis by p, α and ^{16}O induced X-rays, F. Folkmann, J. Borggreen and A. Kjeldgaard **119** (1974) 117
Calculations on tissue equivalence for stopping π^- mesons, T. W. Armstrong and K. C. Chandler . . . **119** (1974) 125
The etching of cellulose nitrate plastic, T. A. Gruhn, E. V. Benton and C. H. Andrus . . . **119** (1974) 131
A large plastic scintillator as anticoincidence shield for beta-radiation detectors, W. Roedel and H. Peter . . . **119** (1974) 135
Effect of electrons and X-rays on alpha-particle registration in T-Cellit detector, M. Várnagy, J. Csikai and S. Szegedi . . . **119** (1974) 261
Radiation balance and electron temperature in a neutralized migma, R. A. Miller . . . **119** (1974) 275
Hochempfindlicher Photoneutronen-Detektor zur "zerstörungsfreien" Submikro-Analyse von Beryllium, Ulrich Quandt und Wilfrid Herr . . . **119** (1974) 279
Backscattering measurements and surface roughness, K. Schmid and H. Ryssel . . . **119** (1974) 287
A focussing low-angle neutron diffractometer, A. C. Nunes . . . **119** (1974) 291
Latent fading in solid-state track etching detectors, E. Piesch and A. M. Sayed . . . **119** (1974) 367
A telescope counter detection system applied to low-energy ion-beam surface analysis, Jean-Paul Thomas, Jean Engerran, Alain Cachard and Jacques Tardy . . . **119** (1974) 373
Experimental flight of a large spherical gas scintillator, P. H. Fowler, R. N. F. Walker, R. T. Moses and A. Worley **119** (1974) 381
Nuclear radiation conversion enhancement with inhomogeneous converters and intensifiers, A. A. Harms and L. D. Molson . . . **119** (1974) 389
Electron-dose distribution and range in vitreous silica from the dilatation determined photoelastically, William Primak . . . **119** (1974) 531
An interpretational technique of sandwich activation measurements, L. Bozzi, F. Caporella, M. Cosimi and M. Martini . . . **119** (1974) 595
The use of a holographic interferometer to measure absorbed energy distributions in water from pulsed electron beams, J. A. Devanney . . . **120** (1974) 7

A directional Cherenkov counter for gamma-ray astronomy, R. D. Andresen, I. Arens, B. G. Taylor and R. D. Wills . . . **120** (1974) 85
Calculations related to the application of silicon detectors in pion radiobiology, Tony W. Armstrong and Kay C. Chandler . . . **120** (1974) 93
An improved method for the determination of the maximum energy of distorted β-spectra and the in-depth localization of spatially distributed β-emitting isotopes, S. C. van de Geijn . . . **120** (1974) 107
A sensitive method for early determination of the artificial activity or aerosolfilters *(Letter to the Editor)*, K. Buchtela, M. Tschurlovits and E. Unfried . . . **120** (1974) 203
Neutron radiography with very cold neutrons *(Letter to the Editor)*, J. C. Bates and S. Roy . . . **120** (1974) 369
Atomic spectroscopy as a diagnostic tool in ion-beam contamination problems *(Letter to the Editor)*, S. Doorn, C. Foster, T. Hoogkamer, H. Roukens and F. Saris . . . **120** (1974) 371
A position-sensitive semi-proportional chamber for ultra-soft X-rays, G. Auriemma, F. Giovannelli, M. Mastropietro and P. Ubertini . . . **120** (1974) 497
A calorimetric radiation dosimeter for an accelerator environment, Kenneth P. Lambert, Marcel H. van de Voorde, Tadayoshi Doke and Tetsuo Inada . . . **120** (1974) 501
Note on clear plastics with wavelength shifters suitable for Cherenkov detectors *(Letter to the Editor)*, K. Atallah and W. K. H. Schmidt . . . **120** (1974) 539
Energy-dispersive fluorescence analysis using Bragg-reflected polarized X-rays *(Letter to the Editor)*, H. Aiginger, P. Wobrauschek and C. Brauner . . . **120** (1974) 541
Depth profile determination by ion-induced X-ray spectroscopy *(Letter to the Editor)*, Wolfgang Pabst . . . **120** (1974) 543
Method of analysis of conversion spectra in the study of atomic environment *(Letter to the Editor)*, M. Fujioka and T. Shinohara . . . **120** (1974) 547

Letters to the Editor

Self-supporting targets of isotopic ^{11}B and ^{13}C, E. H. Woodburn, S. Kundu and W. Del Bianco . . . **111** (1973) 611
Shape of Pierce electrodes for divergent wedge-shaped beams, H. Z. Sar-El, I. Chavet and M. Kanter . . . **111** (1973) 613
On-demand beam pulsing for an accelerator, H. Thibeau, J. Stadel, W. Cline and T. A. Cahill . . . **111** (1973) 615
On cooling silicon surface-barrier particle detectors, F. Calligaris, P. Ciuti, I. Gabrielli and R. Giacomich . . . **112** (1973) 591
Two inexpensive automatic sample changers for use with an MCA, Jon J. Erickson, Eric L. Eastwold, Judson F. Parker, Robert J. Baglan, Kent H. Larsen and A. Bertrand Brill . . . **112** (1973) 597
Single and double escape peaks in Ge(Li) gamma-ray spectra, John R. Johnson and Kenneth C. Mann . . . **112** (1973) 601
Recoil properties obtained from gamma-ray spectra of gross fission products, Bent Schrøder . . . **112** (1973) 603
Production d'un faisceau de Fe^- par pulvérisation cathodique dans une source Penning, M. Dumail et G. Chauland Lottet . . . **112** (1973) 607
On the measurement of the field of a magnetic quadrupole lens by means of a Hall probe, N. Hazewindus and F. Martis . . . **112** (1973) 611
Improved technique for the preparation of thin deuterated polyethylene targets, C. M. Bartle and H. O. Meyer . . . **112** (1973) 615
Preparation of mercury targets, E. B. Fehr and R. E. Peschel . . . **112** (1973) 617
Field corrector for porportional counters, H. M. Horstman, G. Ventura and G. R. Vespignani . . . **112** (1973) 619
Summary of a report on the construction and use of the magnetic ion source of the Pretoria electromagnetic isotope separator, W. H. Gries . . . **113** (1973) 147
Improved quality of some sources of linearly polarized photons, W. R. Dixon, R. S. Storey, A. Ljubičić, R. T. Jones and B. A. Logan . . . **113** (1973) 149
Measurement of the dead-time in a multichannel analyser, L. Mortensen and J. Olsen . . . **113** (1973) 151
A simple algorithm for detection of significantly broad peaks, Z. Kosina . . . **113** (1973) 153
On the calculation of electric field gradient distributions in perturbed angular correlation measurements, H. Zmora, L. M. Lowe and W. V. Prestwich . . . **113** (1973) 155
First operation results of the rf-separated beam at IHEP, Ph. Bernard, I. S. Chodirev, N. A. Galjaev, A. Grant, V. I. Kotov, P. Lazeyras, H. Lengeler, B. Maréchal, J. C. Prélaz, A. A. Prillepin, B. V. Prossin and V. E. Zelenin . . . **113** (1973) 295
A hollow discharge duoplasmatron as a negative hydrogen ion source, Th. Sluyters and K. Prelec . . . **113** (1973) 299
A mechanical sample sweeping system for large surface irradiation, Stanisław Łazarski, Ewa Maydell-Ondrusz and Małgorzata Drwięga . . . **113** (1973) 303
Measurement of Čerenkov radiation in compressed silica powder, A. D. Linney, L. Hugon and J. P. Stroot . . . **113** (1973) 305
Humidity effects in ionization chambers, L. G. Bengtsson . . . **113** (1973) 309
Distortion in the measurement of time-interval distributions, P. B. Coates . . . **113** (1973) 311
Stopping powers and ranges for muons, charged pions, protons, and heavy ions, T. W. Armstrong and K. C. Chandler . . . **113** (1973) 313
A simple differential discriminator, J. M. Rochelle . . . **113** (1973) 315
A simple water-cooled target-mounting system with a short source-to-sample distance used on a 14 MeV neutron generator, E. A. Hermes and H. S. Pruys . . . **113** (1973) 459

Hydrogen cold neutron source calculations for different ortho/para mixtures, H. Kalli . . . 113 (1973) 46
Observation of relativistic rise in the energy loss in plastic scintillator, S. A. Gabriele, P. Giusti, T. Massam, F. Palmonari, G. Valenti and A. Zichichi . . . 113 (1973) 46
Photochromic materials as radiation detectors, P. J. Ouseph and H. E. Groskreutz . . . 113 (1973) 46
A fast charge-sensitive preamplifier for soft X-ray astronomy applications of multiwire proportional chambers, G. Auriemma, F. Giovannelli and C. Mengucci . . . 113 (1973) 47
The amplitude dependence of the induction signal in multiwire proportional counters, J. Dagan, R. Novick and M. C. Weisskopf . . . 113 (1973) 59
Formation of current pulses in semiconductor nuclear radiation detectors, Raymond N. Williams and Ewan M. Lawson . . . 113 (1973) 59
Thickness effect on the K_α/K_β ratio of tin, R. E. Mohler and C. R. Cothern . . . 113 (1973) 59
A rotating target assembly for thin targets, R. C. McFadden and P. W. Martin . . . 113 (1973) 60
Note on high resolution measurements with a tandem accelerator, E. G. Bilpuch, F. O. Purser, J. D. Moses, T. D. Hayward, H. W. Newson, G. E. Mitchell, D. A. Outlaw and R. O. Nelson . . . 113 (1973) 60
Lifetime of carbon foils used as heavy-ion strippers, J. L. Yntema . . . 113 (1973) 60
A gravity operated recoil transfer system, J. K. Archer and J. B. Natowitz . . . 113 (1973) 60
Fast-neutron response characteristics of TSEE dosimeters, Klaus Becker and M. Abd-El Razek . . . 113 (1973) 61
Constant current regulator for fast recharging of high voltage energy storage capacitors, R. W. Findley and J. S. Russ . . . 113 (1973) 61
Comment on "The use of a pileup rejector in quantitative pulse spectrometry", Rainer Rolle . . . 114 (1974) 12
Answer to the comment, J. Bartošek and J. Mašek . . . 114 (1974) 12
Addendum to "Efficiency determination for some standard type Ge(Li) detectors for gamma-rays in the energy range from 0.04 to 11 MeV", H. Seyfarth . . . 114 (1974) 12
A 2 Ge(Li) – 6 NaI(Tl) detector system for gamma–gamma directional correlation studies, L. Eriksson and L. Gidefeldt . . . 114 (1974) 12
The escape peak in Si(Li) planar detectors, N. A. Dyson . . . 114 (1974) 13
On the determination of electron energy losses in absorbers. A study of the ^{137}Cs spectrum, S. C. van de Geijn . . . 114 (1974) 13
Effect of thin absorbers on fission-fragment detector calibration, R. A. Lerche and B. W. Wehring . . . 114 (1974) 13
A plastic track detector with high sensitivity, H. B. Lück . . . 114 (1974) 13
Response of NE 111 scintillator foil to transient ^{16}O ions, P. Braun-Munzinger and C. K. Gelbke . . . 114 (1974) 14
A cold neutron differential reflection spectrometer which utilizes cylindrical reflections, Safdar A. Ali and N. Thomas Olson . . . 114 (1974) 14
Effects of finite dimensions in source–detector solid-angle evaluation, M. Belluscio, R. de Leo, A. Pantaleo and A. Vox . . . 114 (1974) 14
Calculation of the corrected geometry factor in the coincidence measurement of β^+-annihilation γ-rays, T. Nakajima . . . 114 (1974) 14
Transmission of lead-capture gamma rays with a tin absorber, Y. Kawarasaki . . . 114 (1974) 15
A method for quantitative X-ray fluorescence analysis in the nanogram region, Hannes Aiginger and Peter Wobrauschek . . . 114 (1974) 15
Preparation and linewidth of ^{125}Sb(Cu) Mössbauer sources, Punit Boolchand . . . 114 (1974) 15
Non-resonant background and recoil-free fraction of a $BaSnO_3$ ^{119m}Sn Mössbauer source, J. Sitek . . . 114 (1974) 16
Some remarks about the extraction system of the AEG compact cyclotron, H. Liesem . . . 114 (1974) 16
High-field iron magnets. A comparison with theory, D. E. Baynham, J. H. Coupland and J. Simkin . . . 114 (1974) 16
Comment on "Fit to experimental data with exponential functions using the fast Fourier transform", Michael R. Smith and Sorin Cohn-Sfetcu . . . 114 (1974) 17
Poisson and non-Poisson behavior of radioactive systems, Norman A. Frigerio . . . 114 (1974) 17
The effect of different total atomic scattering cross sections on DSAM calculations, B. M. Latta and P. J. Scanlon . . . 114 (1974) 17
Two-channel comparative method of energy spectrum evaluation in measurements using gamma-ray backscattering, J. Šeda and L. Musílek . . . 114 (1974) 18
Spectrum generator using a random sampling technique, W. R. Falk . . . 114 (1974) 18
A single-pulse integrator, Arne Miller . . . 114 (1974) 18
An inexpensive timing single channel pulse height analyzer, Albert M. Gottlieb . . . 114 (1974) 19
A frequency-to-flux density readout converter for the HVEC automatic tracking NMR fluxmeter, D. A. S. Walker 114 (1974) 19
Construction and performance of a large liquid scintillation counter, J. T. Dakin . . . 114 (1974) 39
The shape of spectral lines: analytic deconvolution and matching of Peyre–Principi profiles, H. D. Middendorf. . 114 (1974) 39
Evidence for ethylene-molecule clusters in a gas jet system, W. J. Wiesehahn, J. M. D'Auria and J. C. Irwin . . 114 (1974) 40
Preparation of self-supporting monocrystal Ni-films, K. Reichelt, K. H. Luke and M. Rey . . . 114 (1974) 40
Charge-exchange cell with cesium recycling, M. Bacal, A. Truc, H. J. Doucet, H. Lamain and M. Chrétien . . 114 (1974) 40
A simple beam-energy measurer for heavy ions, D. K. Olsen, N. H. Merrill, S. F. Biagi, W. R. Phillips and A. R. Barnett . . . 114 (1974) 61
Background reduction in X-ray fluorescence spectra using polarization, T. G. Dzubay, B. V. Jarrett and J. M. Jaklevic . . . 115 (1974) 29

Zur Messung der Empfindlichkeitsverteilung von Photovervielfachern auf deren Eintrittsfenster, H.-J. KELLERMANN, H. O. KLAGES, R. LANGKAU, U. PASCHEN und J. REMEN **115** (1974) 301
A simple cell and technique for the electrodeposition of radionuclides on a stainless-steel backing, S. R. JOSHI and J. C. ROY **115** (1974) 303
A simple, cheap, universal ion source, K. JENSEN and E. VEJE **115** (1974) 307
Computer control of a polarized target n.m.r. system, S. W. JOHNSEN **115** (1974) 309
An ion source for high-intensity metal ions, E. D. HUDSON, M. L. MALLORY and R. S. LORD **115** (1974) 311
A multichannel storage capacitor system for processing of fast simultaneous signals, ATSUSHI OGATA **115** (1974) 313
Gas utilisation in ion sources, T. S. GREEN **115** (1974) 619
On the determination of the efficiency of Ge(Li) detectors near the germanium K edge, B. ROSNER and D. GUR . **116** (1974) 171
The relative efficiency of a thin Ge(Li) detector near the K absorption edge of Ge, R. D. SCOTT **116** (1974) 173
Directional dependence of energy measurements in Ge(Li) spectrometers, P. C. LICHTENBERGER and I. K. MACKENZIE **116** (1974) 177
Improvements in proton spectroscopy with Si(Li)-detectors by rise time discrimination, G. LINDSTRÖM and R. LISDAT **116** (1974) 181
A high-pressure gas cell for DSA lifetime measurements, O. SCHAILE, H. GRAWE and R. KOENIG **116** (1974) 185
The efficiency versus freon content for a multiwire proportional counter having 3 mm anode wire spacing, B. DIETERLE, ROBERT HEAPHY and M. K. JOHNSON **116** (1974) 189
Absolute efficiency of channeltron electron multipliers for 10–100 keV X-rays, FRANCO BORDONI, MASSIMO MARTINELLI, MARIO PAGANINI FIORATTI and SILVANA RICCI PIERMATTEI **116** (1974) 193
Preparation of free-standing films of anodic tantalum oxide, DAWNSON PHILLIPS **116** (1974) 195
Coaxial beam-diagnostic probe, A. PAULIN **116** (1974) 197
Use of a univibrator with clear to simplify the logic of a differential discriminator, RYSZARD BAYER **116** (1974) 199
Electron-beam initiated release of thermonuclear energy, CHARLES M. BOWDEN, JERRY W. HAGOOD, RALPH L. NORMAN and JOE SHELTON **116** (1974) 201
On the shape of the photopeak in a NaI (Tl) scintillation detector, T. S. MUDHOLE and N. UMAKANTHA **116** (1974) 401
A new 14 MeV neutron time-of-flight spectrometer at the Kyushu University, M. MATOBA, M. HYAKUTAKE, T. TONAI, J. NIIDOME, Y. MATSUMOTO and N. KIMURA **116** (1974) 405
A parallel plate gas scintillation proportional counter for improved resolution of low-energy photons, H. E. PALMER and L. A. BRABY **116** (1974) 587
Evaporation source for ^{57}Fe thin film deposition, W. KEUNE **116** (1974) 591
A simple spectrum monitor for $E \times B$ velocity filters, H. RYSSEL, H. MÜLLER and K. SCHMID **116** (1974) 593
A new design for accelerating structures, D. T. TRAN **116** (1974) 597
Phase free acceleration of charged particles by ac fields using deflecting coils and triangular shaped hollow electrodes, W. SCHOTT, H.-J. WINTER, H. HAGN, K. SPRINGER and H. DANIEL **116** (1974) 599
Zur Stabilisierung des Strahlstroms aus dem Hamburger Isochronzyklotron mittels einer Steuerelektrode im Ionenquellenausgang, H. KRAUSE und R. LANGKAU **116** (1974) 603
Is the $^{12}C(\vec{d},d_0)$ reaction a good polarization standard?, J. ARVIEUX, J. BIRCHALL, H. E. CONZETT, W. DAMHE, W. HAEBERLI and R. M. LARIMER **116** (1974) 605
Polarizing mirrors for atomic beams, G. BRAUTTI **116** (1974) 609
Tunnel-diode comparator with controlled hysteresis, P. GHELFAN **116** (1974) 611
Diameter evolution of proton tracks in a cellulose nitrate detector, H. B. LÜCK **116** (1974) 613
A thermal and fast neutron monitor for use in a subcritical facility, L. BIRSTEIN, P. MARTÍNEZ, A. FILEVICH and F. LI **116** (1974) 615
Continuous high-field operation of CdTe gamma detectors with MIS-type contacts, P. EICHINGER, N. HALDER and J. KEMMER **117** (1974) 305
Note on "Resolution in experiments of angular correlation of annihilation photons", A. T. STEWART **117** (1974) 309
An energy calorimeter for a cosmic gamma-ray detector, R. K. SOOD, G. K. ROCHESTER and P. G. CLAYTON . . . **117** (1974) 311
On the optimization of the capacitive beam pick-off, W. C. PARKINSON, J. F. PETERSEN and D. C. DUPLANTIS . . . **117** (1974) 605
Regeneration of neutron-damaged Ge(Li) detectors inside the cryostat, R. BAADER, W. PATZNER and H. WOHLFARTH **117** (1974) 609
Un système de contrôle automatique de gain pour les détecteurs à scintillation, GÉRARD HAOUAT et DIDIER GIMAT . **117** (1974) 611
The mean of several quotients of two measured variables, ARIE BODEK **117** (1974) 613
Low-energy duopigatron source with an auxiliary gas feed, R. E. HURLEY **118** (1974) 307
Improvements to resistive-wire focal-plane detector, H. HOMEYER, J. MAHONEY and B. G. HARVEY **118** (1974) 311
A simple method for the analysis of depth-selective Mössbauer-effect measurements, U. BÄVERSTAM, T. EKDAHL, C. BOHM, D. LILJEQUIST and B. RINGSTRÖM **118** (1974) 313
Intensities of γ-rays in the decay of ^{166m}Ho, E. W. A. LINGEMAN, F. W. M. DE BOER and B. J. MEIJER **118** (1974) 609
Electronic processes in liquid xenon, S.E. DERENZO, T. S. MAST, H. ZAKLAD and R. A. MULLER **118** (1974) 611
Comments on: Electronic processes in liquid xenon, J. PRUNIER, R. ALLEMAND, M. LAVAL and G. THOMAS . . . **118** (1974) 613
Rapid production of thin Kr sources, A. J. HOUDAYER, S. K. MARK and R. B. MOORE **118** (1974) 615
Preliminary results on mercuric iodide nuclear radiation detectors, J. P. PONPON, R. STUCK, P. SIFFERT and C. SCHWAB **119** (1974) 197
A fast neutron-gamma discriminator, P. BETZ, G. BRAUN, G. HAMMEL and J. URBAN **119** (1974) 199
An automatic running system for a 500 kV Van de Graaff generator, C.-O. WENE and E. KARLSSON **119** (1974) 395
NMR calibration of a polarized nuclear target, part of which is radiation-damaged, DAVID S. WOLLAN **119** (1974) 397
A new technique for the production of carbon foils, M. J. KEELING **119** (1974) 401

Energy spectrometry of protons by means of a dielectric track detector, H. B. Lück **119** (1974) 40
Wavelength shifters for xenon proportional scintillation counters, M. A. F. Alves, M. C. M. Dos Santos and A. J. P. L. Policarpo **119** (1974) 40
Rise-time jitter reduction in timing and amplitude-discrimination circuits, N. Abbattista, B. Marangelli, D. Marino and V. L. Plantamura **119** (1974) 40
Profile and contamination of an electron beam, Giorgio Romano **119** (1974) 61
Comparison of equal-velocity ion beams for elemental analysis by ion-excited X-ray emission, T. A. Cahill, R. G. Flocchini, P. J. Feeney and D. J. Shadoan **120** (1974) 19
A device for the preparation of composite crystal samples, E. Legrand, S. Hautecler and L. Vansteelandt . . **120** (1974) 19
Fast calibration of large Si(Li) electron detectors from 511.0 to 4564.0 keV using double-escape peaks and Compton edges from ^{66}Ga, R. B. Firestone, R. A. Warner, Wm. C. McHarris and W. H. Kelly **120** (1974) 19
Bandgap dependence of the average energy required for electron–hole pair creation in GaAs and in Si, Reginald D. Ryan **120** (1974) 20
A sensitive method for early determination of the artificial activity of aerosolfilters, K. Buchtela, M. Tschurlovits and E. Unfried **120** (1974) 20
A high-efficiency neutron spin-flipper for time-of-flight applications, G. Badurek, G. P. Westphal and P. Ziegler . **120** (1974) 35
Tritium target for intense neutron source, Rex Booth **120** (1974) 35
A simple laboratory source of 14 MeV neutrons, H. Jeremie, J. C. Deguise and J. Baltar **120** (1974) 35
Design considerations of a simple deuterium gas target for neutron production for therapy with cyclotrons, M. Anwar Chaudhri **120** (1974) 35
High-pressure gas target of modular design, D. V. Webb, G. A. Peterson, Z. M. Szalata and P. T. Kan . . . **120** (1974) 35
An adaptation of the pulser method for the determination of losses in counting short-lived nuclides, W. Görner . **120** (1974) 36
Fluctuations of ionization losses in proportional chambers, A. P. Onuchin and V. I. Telnov **120** (1974) 36
Neutron radiography with very cold neutrons, J. C. Bates and S. Roy **120** (1974) 36
Atomic spectroscopy as a diagnostic tool in ion-beam contamination problems, S. Doorn, C. Foster, T. Hoogkamer, H. Roukens and F. Saris **120** (1974) 37
Zur Verwendung einkristalliner Fasern in Neutronenbeugungsexperimenten, Anton Zeilinger **120** (1974) 52
A new method for monitoring the threshold of a large neutron scintillation counter, A. Christ, G. Nöldeke, W. Nuding and T. Reichelt **120** (1974) 52
Effective solid angle of detecting ^{8}Be nuclei with a dual detector system, J. Shimizu, K. Fujii, K. Takimoto and J. Muto **120** (1974) 52
Fluorescence risetime of NE 102 scintillator, A. J. Campillo, R. C. Hyer and S. L. Shapiro **120** (1974) 53
An ultra-thin-window gas cell, Helmut Laumer, Cary N. Davids, Sam M. Austin and Lolo M. Panggabean . **120** (1974) 53
Preparation of rubidium targets for high resolution reaction spectroscopy, L. Hulstman, R. D. Vis and J. Blok . . . **120** (1974) 53
Note on clear plastics with wavelength shifters suitable for Cherenkov detectors, K. Atallah and W. K. H. Schmidt **120** (1974) 53
Energy-dispersive fluorescence analysis using Bragg-reflected polarized X-rays, H. Aiginger, P. Wobrauschek and C. Brauner **120** (1974) 54
Depth profile determination by ion-induced X-ray spectroscopy, Wolfgang Pabst **120** (1974) 54
Method of analysis of conversion spectra in the study of atomic environment, M. Fujioka and T. Shinohara . . **120** (1974) 54

Proceedings of the International Conference on Nuclear Physics

Munich, August 27 – September 1, 1973.

Volume 1: Contributed Papers
Volume 2: Invited Papers

edited by **J. DE BOER,** Ludwig-Maximilians Universität, Munich, and
H. J. MANG, Technische Universität, Munich.

1973. Price per set of two volumes: Dfl. 216.00 (about US$ 78.60)
Separate price per volume: Dfl. 120.00 (about US$ 43.60)

The proceedings of this international conference on nuclear physics are published in two volumes.
The first is a collection of the accepted one-page contributions submitted and published in time for the start of the conference.
Volume 2 contains the invited talks presented during the conference, the discussions following them and comments which the chairmen of contributed paper sessions chose to submit for inclusion in the proceedings.

CONTENTS:

Volume I: Nuclear interactions. Selfconsistent theories. Nuclear models. Nuclear properties. Nuclear reactions. Astrophysics. Alpha and Beta decay, internal conversion. Atomic aspects. Applications and apparatus. Post deadline papers.

Volume II: Opening addresses. Trends in nuclear physics: What can we learn from high-energy interactions? Trends in nuclear physics: The challenge of precision. Effective interactions and the nucleon-nucleon force. Selfconsistent description of nuclei. Contributed papers. Contributed papers. Nuclear structure with large shell-model calculations. Electromagnetic moments. Cluster structure. Multinucleon transfer reactions. Elastic and inelastic scattering. Light nuclei with large neutron excess. Contributed papers. Contributed papers. Nuclear fission. Synthesis of superheavy elements. Rotation-aligned coupling scheme. High-spin rotational states and nuclear structure. Distribution of charge and magnetism in nuclei. Inelastic electron scattering. Giant resonances. Electromagnetic excitation of high-energy nuclear states. Nuclear methods in archeology. Contributed papers. Contributed papers. Direct reactions with light ions. Pre-equilibrium processes. Intermediate structure in compound-nuclear reactions. Heavy ion fusion experiments. Solar neutrinos. Thermonuclear astrophysics. Contributed papers. Contributed papers. Nuclear reactions with high-energy protons. K⁻-mesonic and baryonic atoms. Conference summary.

ALPHA-, BETA-, AND GAMMA-RAY SPECTROSCOPY

edited by **KAI SIEGBAHN,** University of Uppsala, Sweden.

4th printing 1974. 1800 pages. In 2 vols. 169 tables. 750 illus. US$ 96.25/Dfl. 250.00 per 2 volume set. ISBN 0-7204-0083-X.

First published as Beta- and Gamma-Ray Spectroscopy (1960) and later completely revised and extended (1965) this classic work has just been reprinted for a third time.

The volume contains a complete account of the whole field of radioactivity and related low energy phenomena. The experimental and theoretical advances which have been made since the appearance of the first edition are fully described in various chapters by leading experts. The fundamental changes resulting from the revised parity concepts, in addition to the use of models, new detection methods, faster electronics and many other important improvements, have all been incorporated to ensure that the book is entirely comprehensive in its scope and exhaustive in its coverage.

'I would strongly recommend that you spend a few hours with these volumes long enough to familiarise yourself with their contents. You'll be back for the details when you need them.'
